

Power Training Services WA (PTS)

LIST OF CURRENT COURSES REQUIRING ENROLMENT BY APPLICATION

Western Power overhead line work familiarisation
Schneider reclosers and load break switches
Introduction to Western Power switching procedures
Western Power distribution cable jointing familiarisation - de-energised LV
Western Power distribution cable jointing familiarisation - de-energised HV
Western Power distribution cable jointing familiarisation - LV energised
Western Power distribution cable jointing familiarisation - transition jointing
Western Power Holistic Inspection
Lay ESI electrical cables
Perform straight through high voltage paper insulated to polymeric transition joint
Perform straight through high voltage paper insulated to polymeric transition joint
Install and maintain de-energised low voltage underground polymeric cables
Install and maintain de-energised high voltage underground polymeric cables
Joint and maintain energised low voltage underground polymeric cables
Crane operator supplementary - assessment
Maintain energised HV distribution overhead electrical apparatus (stick)
Maintain energised HV distribution overhead electrical apparatus (stick) - Western Power familiarisation
Maintain energised HV distribution overhead electrical apparatus (glove)
Maintain energised HV distribution overhead electrical apparatus (glove) - Western Power familiarisation

UPDATES:

Additional courses may be added to the list by PTS as required from time to time.
