

Project Management Matrix

UEENEEG169A	UEENEEG170A	UEENEEE015B	UEENEEE011C	UEENEEH141A
<p>T1 Defining project parameters encompassing:</p> <ul style="list-style-type: none"><li>Project scope</li><li>Project stakeholders and clients</li><li>Project phases and the relationship between phases</li><li>Time requirements and limitations</li><li>Resource requirements and limitations</li><li>Quality requirements and limitations</li></ul> <p>T2 Time management concepts and standard practices</p> <p>T3 Financial management encompassing:</p> <ul style="list-style-type: none"><li>Financial management concepts</li><li>Standard practices for managing project finances</li><li>Project budgets</li><li>Costs</li><li>variations and estimations</li><li>Invoicing against project phases/deliverables</li><li>Acquittals and the like</li></ul> <p>T4 Quality management concepts and practices</p> <p>T5 Human Resource management concepts and practices within a project</p> <p>T6 Communication management concepts and practices within a project</p> <p>T7 Risk management and contingencies encompassing:</p> <ul style="list-style-type: none"><li>Risk management concepts</li><li>Internal risks</li><li>External risks</li><li>Contingencies</li><li>Standard practices for managing risk within a project</li><li>Risk minimisation</li><li>Risk removal; and the like</li></ul> <p>T8 Procurement management concepts and practices</p> <p>T9 Physical Resource management concepts and practices relating to equipment, technology, information and facilities</p> <p>T10 Contracts encompassing:</p> <ul style="list-style-type: none"><li>Contract format</li><li>Contract content</li><li>Interpreting contract clauses</li><li>Legal obligations of contract parties</li><li>Working to contract specifications</li><li>Documentation accompanying contracts such as schedules and the like</li></ul> <p>T11 Performance assessment and continuous improvement</p> <p>T12 Engineering ethics principles</p> <p>T13 Customer/Client relations encompassing:</p> <ul style="list-style-type: none"><li>Importance of customer/client relations</li><li>Interpersonal skills that enhance customer/client</li><li>Dispute resolution</li><li>Customer/client relations strategies</li></ul> <p>T14 Electrical industry sector customs and practice encompassing:</p> <ul style="list-style-type: none"><li>Equipment procurement, cost/benefit analysis and performance testing</li><li>Typical approaches to planning and management</li><li>Successful planning techniques</li><li>Best practice management methods and styles</li></ul>	<p>T1 Project planning encompassing:</p> <p>T2 Purpose of project planning Evidence shall show an understanding of managing electrical projects to an extent indicated by the following aspects:</p> <p>T3 Defining project parameters encompassing:</p> <ul style="list-style-type: none"><li>Project scope</li><li>Project stakeholders and clients</li><li>Project phases and the relationship between phases</li><li>Time requirements and limitations</li><li>Resource requirements and limitations</li><li>Quality requirements and limitations</li></ul> <p>T4 Time management concepts and standard practices</p> <p>T5 Financial management encompassing:</p> <ul style="list-style-type: none"><li>Financial management concepts</li><li>Standard practices for managing project finances</li><li>Project budgets</li><li>Costs</li><li>variations and estimations</li><li>Invoicing against project phases/deliverables</li><li>Acquittals and the like</li></ul> <p>T6 Quality management concepts and practices</p> <p>T7 Human Resource management concepts and practices within a project</p> <p>T8 Communication management concepts and practices within a project</p> <p>T9 Risk management and contingencies encompassing:</p> <ul style="list-style-type: none"><li>Risk management concepts</li><li>Internal risks</li><li>External risks</li><li>Contingencies</li><li>Standard practices for managing risk within a project</li><li>Risk minimisation</li><li>Risk removal; and the like</li></ul> <p>T10 Procurement management concepts and practices</p> <p>T11 Physical Resource management concepts and practices relating to equipment, technology, information and facilities</p> <p>T12 Contracts encompassing:</p> <ul style="list-style-type: none"><li>Contract format</li><li>Contract content</li><li>Interpreting contract clauses</li><li>Legal obligations of contract parties</li><li>Working to contract specifications</li><li>Documentation accompanying contracts such as schedules and the like</li></ul> <p>T13 Performance assessment and continuous improvement</p> <p>T14 Engineering ethics principles</p> <p>T15 Customer/Client relations encompassing:</p> <ul style="list-style-type: none"><li>Importance of customer/client relations</li><li>Interpersonal skills that enhance customer/client</li><li>Dispute resolution</li><li>Customer/client relations strategies</li></ul> <p>T16 Electrical industry sector customs and practice encompassing:</p> <ul style="list-style-type: none"><li>Equipment procurement, cost/benefit analysis and performance testing</li><li>Typical approaches to planning and management</li><li>Successful planning techniques</li><li>Best practice management methods and styles</li><li>Documents needed to plan a project</li><li>Factors influencing sequence and restraints of project activities</li><li>Critical path analysis covering graphical representation methods and methods of representing time/rates</li></ul> <p>T17 Critical path and project analysis encompassing:</p> <ul style="list-style-type: none"><li>Purpose of critical path analysis</li><li>Essential data</li><li>Relational sequence of work activities</li><li>Graphical representation methods</li><li>Methods of representing time/rates</li><li>Monitoring methods</li></ul> <p>T18 Electrical industry sector customs and practice encompassing:</p> <ul style="list-style-type: none"><li>Equipment procurement, cost/benefit analysis and performance testing</li><li>Typical approaches to planning and management</li><li>Successful planning techniques</li><li>Best practice management methods and styles</li></ul>	<p>T1 Purpose of customer relations encompassing:</p> <ul style="list-style-type: none"><li>Procedures for dealing with customer issues</li><li>Dealing with customer issues</li></ul> <p>T2 Purpose of critical path analysis encompassing:</p> <ul style="list-style-type: none"><li>Essential data</li><li>Relational sequence of work activities</li><li>Graphical representation of the project life cycle and other project management functions</li><li>Implementing risk management methods</li></ul>	<p>T1 The need for risk management within the broad project management framework</p> <p>T2 Risk management methodologies, their capabilities, limitations, applicability and outcomes</p> <p>T3 Uncertainty and the means of measurement</p> <p>T4 The application of risk management tools and techniques</p> <p>T5 Risk management in the context of the project</p> <p>T6 Implementing risk management</p>	<p>T1. Electronic/computer systems industry sector customs and practices</p> <ul style="list-style-type: none"><li>Technical aspects of project planning and management encompassing:</li><li>Method of ensuring equipment meets specified performance requirements</li><li>Performance/cost benefit analysis</li><li>Equipment procurement</li><li>Typical approaches to planning and management</li><li>Successful planning techniques</li><li>Best practice management methods and styles</li></ul> <p>T2. Defining project parameters - Project scope; Project stakeholders and clients; Project phases and the relationship between phases; Time requirements and limitations; Resource requirements and limitations; Quality requirements and limitations.</p> <p>T3. Time management - time management concepts; standard practices for ensuring a project runs to time and the like.</p> <p>T4. Financial management - Financial management concepts; Standard practices for managing project finances; Project budgets; Costs, variations and estimations; Invoicing against project phases/deliverables; Acquittals and the like.</p> <p>T5. Quality management - Quality management concepts; Standard practices for managing quality within a project.</p> <p>T6. Human Resource management - human resource management concepts; standard practices for managing personnel within a project</p> <p>T7. Communication management - Communication management concepts; Standard practices for managing communication within a project and the like.</p> <p>T8. Risk management and contingencies - risk management concepts; standard practices for managing risk within a project; Internal risks; External risks; Risk minimisation; Risk removal; Contingencies and the like.</p> <p>T9. Procurement management - procurement management concepts; standard practices for managing procurement and the like.</p> <p>T10. Physical Resource management - Types of physical resource, including; Equipment, Technology, Information, Facilities; Physical resource management concepts; Standard practices for managing physical resources</p> <p>T11. Contracts - Understanding project contracts; Standard practices for working to contract specifications; Contract format; Contract content; Legal obligations of contract parties; Accompanying documentation including; Contract Schedules and the like.</p> <p>T12. Performance assessment and continuous improvement - standard performance assessment practices; standard continuous improvement practices and the like</p> <p>T13. Engineering ethics principles</p> <p>T14. Customer/Client relations</p> <ul style="list-style-type: none"><li>Importance of customer/client relations</li><li>Interpersonal skills that enhance customer/client</li><li>Dispute resolution</li><li>Customer/client relations strategies</li></ul>
