house vinyl care

maintaining and care of the upholstery should be done by regular vacuuming to remove dust and dirt. we do not recommend removing the cushion covers. machine washing can cause the covers to shrink. spot cleaning should be done immediately after a spill. always air dry and do not store away wet/damp cushions at any time- they are mildew resistant not mildew proof.

suntan lotions and sprays such as insect repellants may discolour the fabric. acid based liquids such as coffee, wine and fruit juice need to be wiped off immediately. the longer a stain or spill remains on the fabric the more difficult it can be to remove. do not use abrasive alcohol based or solvent based cleaners.

first spot clean with mild soap and water. using a sponge to remove the stains, rinse with clean water.

custom specified upholstery

please refer to individual suppliers for information on care and maintenance of fabrics that have been specified by a designer, as these will be outside the standard grazia&co range. most interior upholstery fabric should be regularly vacuumed and kept away from direct sunlight.

powder coated items care

wash as required with warm soapy water using a soft clean cloth. for marine or commercial environments, we recommend regular cleaning. do not pressure wash or steam items that are powder coated. if powder coating chips due to a knock and / or rough treatment this is not covered by warranty. touch up paint can be purchased on request (depending on availability). scratches and chips should be repaired as soon as they appear.
