### **Policy Statement:**

Netball Central has provided our members with a world-class facility for our sport. It provides for new and enhanced competitions for members at all levels and it has first-class training and education facilities for administration, coaching and officiating.

I strongly believe in the provision of appropriate structures and policies that assists Associations in meeting their statutory obligations to both Government and their members. I strongly support the Member Protection Policy in all its facets particularly for the ‘protection’ of volunteers administering our sport. As Chair of the Board Governance Committee I will continue to champion these goals to our Associations. I am also a member of the Board Audit and Risk Committee and in this role will continue to oversee achievement of a sound and cost-effective financial base that is risk averse for all members.

I will continue to support the strategic management of resources, both financial and human so that cost-effective services are provided throughout our Organisation.

To achieve our vision for Netball NSW requires Directors to be skilled, passionate, committed and champions of our sport. I believe I demonstrate these attributes to enable me to make further positive contributions to a leading sport of choice in NSW.
