

4. ADMINISTRATOR PRIVILEGES

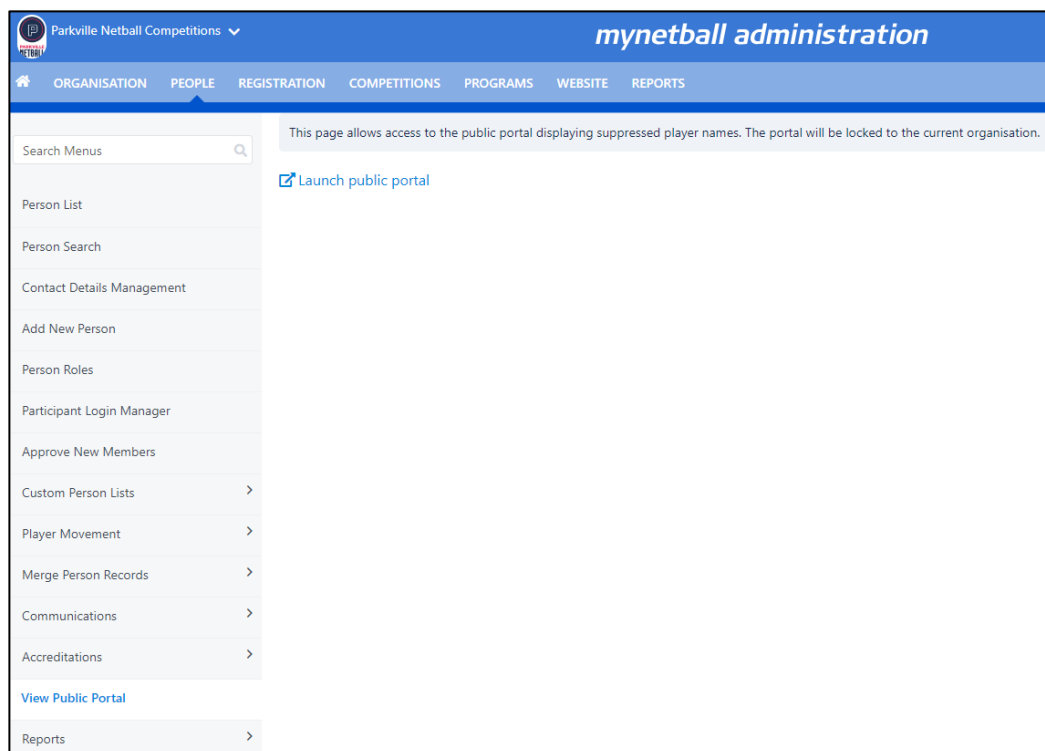

We understand that some pages/reports on the public portal are utilised for administration purposes, and that visibility of players that competed in matches is necessary.

Therefore, we have permitted administrators to continue to have access to participant information provided they are logged in.

4.1. Access to Public Portal Information

To conduct administrative tasks bypassing hidden names, logged in administration users will be able to launch a version of the public portal customised to the entity the user is currently administering.

The setting to suppress names is bypassed when navigating via the admin portal.

All player names will display and the portal is locked to the current organisation. To reset close all browser windows or click here.
