

FODICO

MARINE GROUP

CAPABILITY Statement 2026

40 Years Strong

Delivering high-quality marine solutions
with a steadfast commitment to trust,
safety and long-term partnerships

our COMPANY Overview

Operating with integrity and ingenuity since 1986, Fodico Marine Group (FMG) is a privately owned and well-established marine services provider. We have a steadfast commitment to the high standards of our vessels, reliability, project completion and client satisfaction.

FMG operate from two Queensland shore bases in Gladstone and Brisbane. Our substantial water-front land holdings, workshops and in-water facilities at the Gladstone Marina coupled with the operational base in Brisbane ensures we mobilise efficiently within the Australian, New Zealand and Pacific Island regions.

DIVERSE FLEET & SERVICES

FMG own and operate an impressive fleet of landing craft, ferries, ocean going & harbour tugs, work boats, multi-cats, crew vessels and dumb barges. Proudly, 70% of our fleet is Australian designed and built.

Our fleet is dedicated to successfully leading and supporting;

- Marine transport & logistics
- Marine infrastructure works
- Towing operations
- Wreck removal & salvage
- Commercial dive support
- Hydrographic survey
- Plough dredging & Bed levelling
- Research & Environmental monitoring
- Crew transfer

ISO-ACCREDITATION & SYSTEMS

Our personnel and fleet are supported by robust & evolving operating and management systems. Our Quality, Occupational Health & Safety and Environmental Management systems are audited by 3rd parties and are internationally accredited and certified for;

- ✓ ISO 9001
- ✓ ISO 14001
- ✓ ISO 45001

Our EXPERTISE

MARINE TRANSPORT & LOGISTICS

Fodico Marine Group provides efficient, flexible and fully integrated logistics and transport solutions with vessels equipped to handle coastal and offshore operations. We partner with a wide range of clients from Tier-one contractors, government agencies, private and commercial entities to deliver one-off projects and regular services for long-term clients. We are sought after and recognised in the industry for our ability to manage logistical challenges in difficult coastal locations.

- Versatile fleet of landing craft available for dry and wet hire
- Cargo transport, RORO delivery
- Oversize freight movements
- Vessels with up to 485sqm of working deck space
- Bulk cargo fuel and licensed potable water delivery
- Ferry/barge operations with up to 220 pax in single voyage

“FMG’s extensive experience in managing difficult loads and the reliability of our vessels resonates well with clients. This reputation is testament to Fodico Marine Groups early and enduring involvement with Bechtel and the construction of all three LNG plants on Curtis Island from 2010 onwards.”

Our EXPERTISE

MARINE INFRASTRUCTURE WORKS

FMG has expanded into this sector by providing project specific barges paired with appropriate tug vessels which maximize capacity and minimise our footprint on site. We have developed floating plant combinations that serve the light-medium marine construction sector.

- Construction, demolition and maintenance
- Navigational aid installations
- Pile driving and extraction specialists
- Jetty & wharf removal including revetment wall stabilization
- In-house demolition license
- Armour rock capabilities
- Dumb Barges (24 to 36m)
- A-frame, crawler & franna cranes, pile driving and mooring equipment
- In-house fabrication capabilities, large workshop with qualified tradesmen
- Provision of small tenders and work boats to support these operations.

“A highly capable team that always goes the extra mile to deliver dependable results and practical solutions in challenging port environments.”

Tonilee Andrews, Port Engineer
Port Kembla, NSW

Our EXPERTISE

SEABED LEVELLING & DREDGING

The vessel Pacific Tiger has been configured uniquely for bed levelling and has been successfully completing campaigns on the east and southern coastlines of Australia since 2007. The vessel is a tried and trusted machine with an impressive track record, consistently delivering projects on schedule.

- Sediment redistribution
- Bulk material removal
- Seabed profiling, levelling
- Designed and purpose-built equipment for light and heavy ground engagement
- Sea rake and multiple sweep-bar types
- Lead vessel fitted with first class GPS systems, Quinsey Software, Multi-beam sea floor mapping and real time tide data.
- Survey vessel support available.

The expert crew deployed on this vessel are highly experienced and have been with the Pacific Tiger for over a decade, successfully completing bed leveling contracts in multiple ports across Australia.

Our EXPERTISE

“It was a privilege to meet and watch you and your team work... an incredible display of professionalism and expertise.”

Vessel Owner’s Family,
Burnett River Salvage, QLD

HYDROGRAPHIC SURVEY

Our lead vessel, the Sounds Pacific has been completing Queensland wide port surveys and the annual Weipa dredging campaign since her purchase and refit in 2022.

- Hydrographic survey operations
- Capable of accurate surveys in 1.5m swell at 12 knot speeds
- Fitted with 750mm x 600mm moon pool to accommodate hydrographic survey equipment
- Versatile plug-type mounting system, supporting multiple transducer types
- Pre-wired for the most popular survey suites
- Ability to mobilise this vessel within hours due to her fit out.

“Fodico’s team delivers sustainable, reliable outcomes year after year—trusted by clients to get the job done without constant oversight.”

Barry Smith, Director, NaMaSys Pty Ltd

WRECK REMOVAL & SALVAGE

FMG has a specialised & committed team working with local government agencies and international insurance companies for the fast and effective recovery of stricken and sunken vessels.

- We often work under the “No Cure, No Pay” contracts for our international clients
- Purpose-built salvage equipment including heavy lift air bags and heavy-duty A-Frames mounted to salvage barge
- Removal of seabed debris, ships anchors and marine hazards
- Fast deployment of assets and crew.

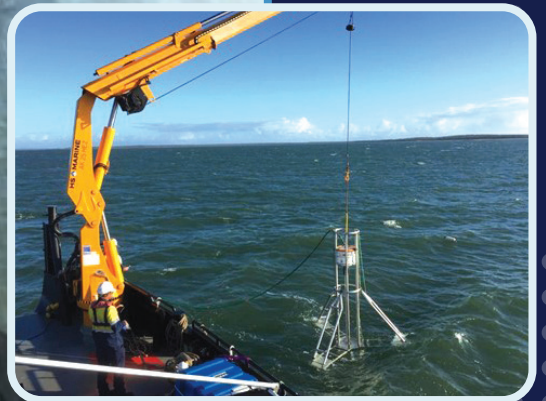

Our EXPERTISE

RESEARCH & ENVIRONMENTAL MONITORING

Our team has a long history of involvement with a number of research operations throughout Queensland waters. FMG is entering a new vessel in this space with the 35m catamaran, Shepparton. She will be equipped with large client-only meeting rooms and relaxation spaces and feature an airconditioned wet lab with direct access to the aft deck and a 10 tonne, 5-metre-wide A frame. FMG has dedicated industry partners within the Commercial dive support & supply space to assist with our projects.

- Vessel support for environmental baseline surveys and long-term monitoring programs
- Deployment and retrieval of oceanographic sensors, current meters, and buoys
- Water quality sampling in coastal and port environments
- Hydrographic and geotechnical investigation assistance
- Support for sediment coring, vibrocoring, and grab sampling
- Seabed habitat and ecological assessment logistics
- Support for seagrass and marine flora monitoring operations
- Onboard facilities for marine scientists and survey teams
- Low-impact, fuel-efficient operations aligned with ISO 14001 standard
- Marine Parks permits for all vessels.

Our FACILITIES

"Fodico Marine Group continue to secure contracts with long-term clients due to our unrivalled flexibility and first-class facilities."

HEADQUARTERS

GLADSTONE MARINA

- Located in the CBD Marina with multiple company owned, cyclone rated berths up to 50m
- Dedicated maintenance berths and dry boat storage available
- Project loadout yard with direct access for project equipment to be walked onto barges
- Roll-on/Roll-off barge ramp with purpose-built loading wedge
- Abutment facilities at two of the Gladstone Marina yards
- Secure undercover storage and secure yard laydown areas with barge-loading and crane load-out capacity
- Water front pile splicing yard with crane, concreted foundations and pipe rotators
- Large, fully equipped 400 sqm workshop providing marine-focused fabrication services, including pressing, bending, cutting, machining and all-discipline welding. Mobile units and services also available.
- Extensive ancillary equipment including; mooring systems, hydraulic power packs, deck winches, wheel loaders, 60t crawler crane, 15t franna crane, 35t excavator, semi truck, tilt tray, forklifts. JLGs and site huts
- Waterfront Head Office and Conference Room facilities, goods receivable and dispatch service available.

BRISBANE OPERATIONS BASE

- Access to barge berths and waterfront hardstand on request
- All weather barge loading ramp and crane load out facilities available
- Project Office available.

Our CLIENTS & PARTNERS

The success of our 2nd generation family-owned Company is founded upon our ability to provide clients access to the combined strength of our highly experienced personnel and our diverse marine fleet. This valuable combination enables us to meet unique and complex project requirements. We have been proud to partner with the following on various projects:
