

Steel Panther, Poison, Warrant and Wasp are four very handy barges or punts. These vessels are powered by 60hp four stroke Mercury engines and are an asset to any marine project.

The barges are constructed from steel and feature a 1200mm cut out in the bow for straddling piles. They also feature D-mould rubber all round to protect painted surfaces.

Various platforms and stages can be easily adapted to the deck, which is flat and obstacle free.

Easily road transportable and launched from a tilt tray to your next project.

Specifications

Survey.....AMSA 2E
Length.....5.95m
Width2.5m
Operating Draft.....0.4m

Machinery

Main Engines.....1 x Mercury
Power.....1 x 60hp
Service Speed.....8 knots
Max Speed.....10 knots

Accommodation

Passengers.....2E 4 pax
