

Capability Statement

Champ Group specialises in delivering safe, compliant, and efficient solutions across the full asset lifecycle – construction, commissioning, operations, and long-term maintenance.

Champ Group is a trusted, multi-service partner for building, infrastructure, and industrial maintenance across Queensland. Since 2013, the company has supported mining, government, industrial, and commercial sectors with licensed, ISO-certified solutions that reduce complexity and deliver dependable results.

Key strengths include:

Integrated, multi-trade delivery

Building, electrical, plumbing, security, fabrication and more, all streamlined under a single contract.

Renewables-ready expertise

Supporting Queensland's energy transition through fabrication, construction, and asset maintenance.

Proven long-term partnerships

Trusted by leading mining, infrastructure, and government clients for contract-based delivery.

Certified systems and compliance

ISO 9001, ISO 14001, and ISO 45001 accreditation with robust safety and quality processes.

Regional strength with statewide reach

Teams based in key hubs ensure fast mobilisation and consistent service.

This approach allows procurement managers, site supervisors, and operational leads to reduce vendor management, minimise risk, and gain confidence that critical projects will be delivered on time and to specification without the noise.

Led by Managing Director Zane Thiele, an experienced industry professional with a background in civil, industrial, marine, and mining projects, Champ Group is built on practical knowledge, strong client relationships, and a focus on reliable outcomes.

With operational bases across Central Queensland, and our ability to mobilise to where you are, Champ Group provides Tier 1 capability backed by the responsiveness of a regional partner.

Facilities Management

Your facility. Our priority.

Comprehensive, multi-trade facilities management built for long-term operational reliability. Our contracted services include building maintenance, repairs, electrical and mechanical servicing, preventative maintenance programs, security and access control, cleaning, and landscaping. Our integrated delivery model ensures every trade works together seamlessly, reducing downtime and administrative complexity.

Infrastructure Maintenance

Built for performance.

Specialist maintenance and upgrade works for critical site infrastructure, from structural and civil repairs to shutdown services and transport network maintenance. Delivered by licensed trades with a safety-first culture, we bring efficiency, compliance, and consistency to complex operational environments.

Fabrication

Strength and precision.

In-house and on-site fabrication services for mining, industrial, transport, and marine sectors. We produce structural steelwork, custom components, platforms, using carbon steel, aluminium, and stainless steel. Our responsive teams ensure fit-for-purpose solutions built to Australian Standards.

Construction Projects

Complete from setup to shutdown.

Design, build, and installation services for new works, refurbishments, shutdowns, and upgrades. With expertise in engineering, bulk and detailed earthworks, mechanical installation, concrete works, protective coatings, and site establishment, we coordinate every stage with precision and compliance.
