Next Generation High Accuracy Digital Fire Sprinkler Flowmeter GI-DSFM1

We are proud to introduce our NEW next generation high accuracy digital fire sprinkler flowmeter (for use with standard annubars).

Our model GI-DSFM1 incorporates a state-of-the-art digital, full 316 stainless steel D.P. sensor and display, with temperature display and a range of 0/30 inches of mercury (in. Hg), this can also be changed to 0/100 kPa.

There are no moving parts in the D.P. indicator, therefore eliminating corrosion, hysteresis and poor measurement accuracy.

SPECIFICATIONS	Model	GI-DSFM1
	Range (D.P.)	0/30 in Hg
	Resolution	0.1 in Hg
	Accuracy	+/- 1% (or better)
	Temperature Range	-30 / 80°C
	Relative Humidity	0/80% RH
	Protection Class	IP65
	Power Supply	Long Life Lithium Battery
	Over-Pressure Protection	600 in Hg (or 2000 kPa)
	Inlet Filters	Sintered Brass

These Gould products have worldwide patents in place for all PCT countries
