

Basis for Floor Level Calculations:

Coastal floor level = 100yr ARI storm tide level + 2m (wave setup, runup and freeboard allowance) + 0.3m (Greenhouse related MSL rise allowance)

Inland floor level = 100yr ARI storm tide level + 0.35m (wave setup allowance) + 0.3m (Greenhouse related MSL rise allowance) + 0.3m (freeboard)

Note that properties outside the areas indicated in this map should be assessed on a case by case basis

Legend	
	Extent of Area Assessed
	Recommended Minimum Floor Level = 3.27m AHD
	Recommended Minimum Floor Level = 3.32m AHD
	Recommended Minimum Floor Level = 4.62m AHD
	Recommended Minimum Floor Level = 4.67m AHD
