

MEDIA RELEASE

COVID-19 daily update

28 January 2022

As at 7pm on January 27, the total COVID-19 cases in the North West Hospital and Health Service is 894. Of these, 64 were reported in the last 24 hours.

North West Hospital and Health Service has aligned COVID-19 daily reporting with the Queensland Health's COVID-19 statistics webpage, found here: <https://bit.ly/covid-19-statistics-qlhhealth>. These figures are updated daily and reflect the latest numbers as at 7pm on the previous day and include a location breakdown of cases.

COVID-19 positive cases continue to increase in North West communities in line with other areas of Queensland. Keep yourself and others safe by continuing to wear face masks, ensuring social distancing, and being diligent with hand hygiene and washing.

There is currently good availability of COVID-19 vaccines available across the North West. Those aged 5 to 11 years are encouraged to commence your vaccination cycle before the recommencement of school in 2022.
