

## Information for teachers

Schools engage with the Port of Townsville for a variety of reasons. Sometimes they just want to have a look at what happens at the Port. On other occasions, they ask for a Port experience that relates to specific topics that are currently being covered in the classroom.

If you are looking for a Port experience that complements your classroom learning, we will be happy to tailor a visit that aligns with the **Australian National Curriculum** from Foundation through to Year 12.

The Port of Townsville also provides an ideal location to see how STEM learning (Science, Technology and Mathematics) is applied in everyday life. During a visit to the Port, your students will see how STEM has practical applications.

The Port of Townsville is Northern Australia's gateway to the world, so we think globally as well as locally. We therefore promote the **UN Sustainable Development Goals** as part of the Port's engagement with schools.

Our team commits to creating a Port experience that works for you and your students and we look forward to hearing from you.
