RUSWIN

BUILT FOR THE REAL WORLD

SECURITY SOLUTIONS. REAL WORLD RESULTS.

Ruswin delivers practical, reliable, integrated solutions designed for real operational environments where performance matters.

ABOUT **RUSWIN**

Ruswin delivers integrated security, technology and audio-visual solutions designed for complex, high-risk and operationally demanding environments — where failure has consequences.

With more than 50 years of experience across mining, government, commercial and critical infrastructure sectors, we help organisations improve security, operational visibility, access control and communication across remote and multi-site operations.

From mine sites and processing facilities through to accommodation camps, operational centres and commercial infrastructure, Ruswin designs and delivers systems that perform reliably in the real world — not just on paper.

WHY **RUSWIN**

- Proven experience across remote and regional mining operations
- Integrated electronic and physical security expertise
- Solutions designed for harsh and high-risk environments
- End-to-end delivery from design to ongoing support
- Strong focus on safety, compliance and operational continuity
- Multi-country capability with local operational support

SERVICES & SOLUTIONS

CCTV & VIDEO MANAGEMENT

High definition surveillance solutions for real-time monitoring, incident detection and evidence management.

ACCESS CONTROL

Manage and monitor access across sites, facilities and restricted areas with scalable access control solutions.

ELECTRONIC SECURITY

Intrusion detection, alarms and monitoring systems to protect people, assets and critical infrastructure.

PERIMETER PROTECTION

Advanced perimeter detection and monitoring solutions to secure sites and prevent unauthorised access.

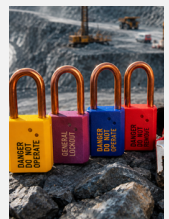

LOCKSMITHING & KEY MANAGEMENT

Restricted key systems and key management solutions to ensure controlled and accountable access.

TAG IN / TAG OUT

Restricted key systems and key management solutions to ensure controlled and accountable access.

BUILT FOR DEMANDING ENVIRONMENTS

From complex urban facilities to remote mining operations, Ruswin delivers practical, scalable solutions that improve security, safety and operational performance. Our experience across critical infrastructure environments ensures systems are designed to withstand harsh conditions, support day-to-day operations and provide long-term reliability where it matters most.

SECURITY TECHNOLOGY**

MINING SECURITY SOLUTIONS

Ruswin delivers reliable, site-specific security and access solutions designed to perform in harsh mining environments.

In mining environments, downtime, visibility and access control failures can have major operational consequences.

Ruswin works closely with mining operators, contractors and infrastructure teams to deliver practical, scalable and site-specific solutions that support both day-to-day operations and long-term operational performance.

BUILT FOR INDUSTRIAL ENVIRONMENTS

Mining and industrial operations require reliable, integrated solutions designed to perform under pressure in complex operational environments.

WHAT YOU'RE DEALING WITH:

- Harsh operating conditions
- Uptime risk
- Remote infrastructure
- Multi-site operations
- Safety and compliance pressures
- Operational visibility challenges

HOW RUSWIN HELPS

- Reliable systems for complex environments
- Integrated security and operational technology
- Scalable multi-site solutions
- Long-term support and accountability
- Systems that work when it matters most

WHY RUSWIN FOR MINING

REMOTE SITE CAPABILITY

Strong capability in mining and critical infrastructure operations, including remote sites.

BUILT FOR DEMANDING ENVIRONMENTS

Security and communications systems engineered to deliver consistent performance across remote, high-risk and operationally intensive sites.

RELIABILITY THAT LASTS

Solutions built for long-term performance in the most demanding environments.

FOCUS ON RESULTS

Enhancing site security, improving operational control and supporting resilient infrastructure.

PROJECT **EXPERIENCE** & CASE STUDIES

Ruswin has successfully delivered integrated security and technology solutions across mining, critical infrastructure and operational environments throughout Australia and the Pacific.

CQ WATER PLANT NEW SECURITY INSTALL

Integrated security upgrade including Gallagher access control, intrusion detection, CCTV integration and network infrastructure.

SCOPE OF WORKS

Gallagher Access Control & Intruder Detection

Hanwha CCTV & NX Witness VMS

Network Integration

Testing & Commissioning

PROJECT DELIVERY

As a long-standing Gallagher Channel Partner, Ruswin efficiently delivered the project while maintaining strict compliance with site safety and operational standards.

OUTCOME

- Fully integrated security system
- Improved operational efficiency
- All systems operational on completion
- Ongoing client support

PROJECT DELIVERY

FULLY INTEGRATED SECURITY SYSTEM

ALL SYSTEMS OPERATIONAL

ONGOING PARTNERSHIP AND SUPPORT

FUTURE FOCUSED SECURITY SOLUTIONS

RURAL MINING WORKFORCE SALTO ACCESS CONTROL UPGRADE

Large-scale Salto access control upgrade across a live accommodation camp environment integrating approximately 500 devices.

SCOPE OF WORKS

500+ Salto XS4 Escutcheons

Energy Saving devices (ESDs)

PMS Integration (Salto Space)

Testing and Commissioning

PROJECT DELIVERY

Completed within a live accommodation environment in approximately **3.5 weeks** with minimal disruption to daily operations.

Delivered ahead of schedule through efficient project management and coordination.

OUTCOME

- Modern, integrated access control system
- Improved accommodation management
- Enhanced site security
- Fully operational upon completion

PROJECT SNAPSHOT

500+ SALTO DEVICES INSTALLED

INTEGRATED WITH CLIENT PMS

COMPLETED IN **3.5 WEEKS**

LIVE OPERATIONAL ENVIRONMENT

SECURITY & TECHNOLOGY

Ruswin partners with leading global technology providers to deliver reliable, scalable and future-ready solutions across mining and critical infrastructure environments.

Ruswin is proud to partner with **Hanwha Vision** and **EKA CyberLock** at the Mining Expo

Hanwha Vision

ADVANCED VIDEO SURVEILLANCE

- ✓ AI-powered analytics and intelligent detection
- ✓ High performance CCTV for any environment
- ✓ End-to-end video management solutions

INTELLIGENT KEY MANAGEMENT

- ✓ Electronic Key Control and asset security
- ✓ Real-time access monitoring and audit
- ✓ Improved accountability and operational control

Ruswin has longstanding partnerships with

WHY ORGANISATIONS CHOOSE **RUSWIN**

Ruswin is trusted by organisations operating in environments where reliability, accountability and operational performance matter.

50+ YEARS EXPERIENCE

More than five decades of delivering trusted security, technology and AV solutions across mining, critical infrastructure, government and commercial environments.

LOCAL SUPPORT

Local teams providing responsive support, on-the-ground expertise and reliable service wherever and whenever you need it.

INTEGRATED SOLUTIONS

Bringing together electronic security, physical security, operational technology and communications into a single, cohesive solution.

PROVEN PROJECT DELIVERY

Successfully delivering complex security, technology and communications projects from concept through to ongoing support.

WHAT SETS **RUSWIN** APART

REAL-WORLD EXPERIENCE

We operate in complex environments where systems need to perform reliably under pressure.

END-TO-END DELIVERY

From design and installation through to maintenance and support, we manage the full lifecycle.

INTEGRATED CAPABILITY

Electronic security, physical security and operational technology working together.

MULTI-REGION SUPPORT

Operational capability across Australia and the Pacific

CLIENT TESTIMONIAL

“Through Ruswin’s professional expertise and strong project delivery capability, the implementation of the Access Control system has been highly successful.

Since deployment, we’ve seen clear improvements in operational efficiency, site security and user management, while gaining greater visibility and control across the facility. The solution has strengthened our operational capability, and the ongoing support from the Ruswin team has been instrumental.”
