

Powering the Connected Home

Alarm.com delivers innovative connected home technology solutions that provide better security, convenience and control for residential and commercial customers. Our commitment to technology leadership gives our Partners an edge for success with first-to-market services and features that open new opportunities for growth and high-value account creation. With an industry leading range of panels, a large and rapidly growing ecosystem of devices, and a complete family of mobile apps, Alarm.com helps you deliver the right solution to match any customer need.

-  Interactive Security
-  Video Monitoring
-  Energy Management
-  Home Automation
-  Wellness Solutions

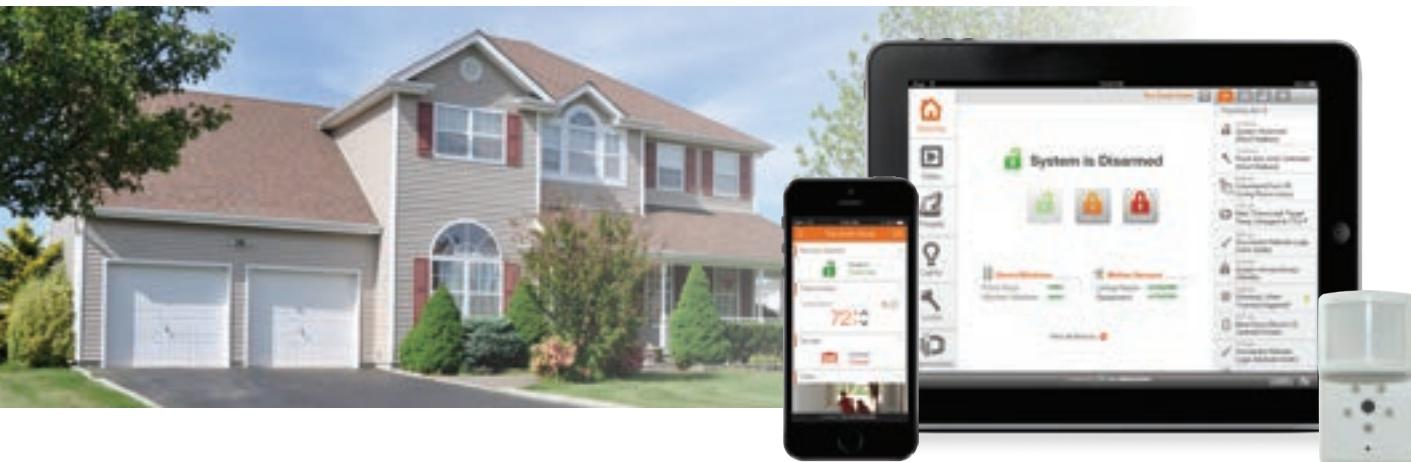

Solutions

Interactive Security

Alarm.com's advanced Interactive Security solution offers best in class protection through exclusive features that differentiate our Partners in a competitive market. Homeowner's have full control over their system through our family of mobile apps, and can stay informed and in control of what's happening at their property from anywhere.

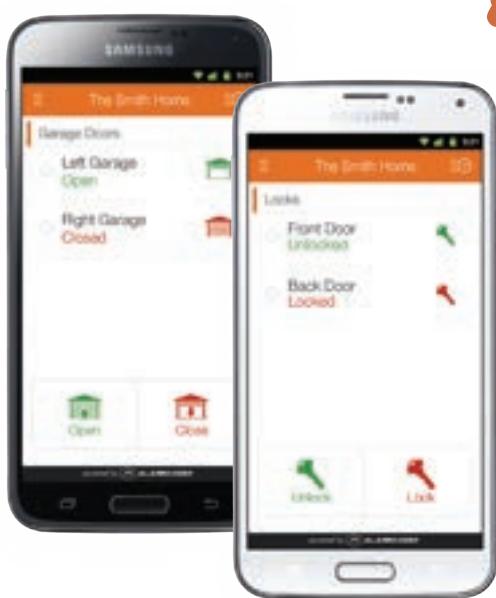

Easy to install, tamper resistant technology

- Alarm.com's cellular connectivity can't be cut and protects your customers during blackouts and internet disruptions, and avoids complications and support costs associated with in-home Wi-Fi networks.
- Alarm signals get through even when the panel is destroyed with patented Crash & Smash technology.
- Offer visual verification with the cost effective Image Sensor—the first ever image capture motion sensor.

Home Automation

Give your customers peace of mind with complete control and awareness. Alarm.com's rich Home Automation solution enhances security and offers a full range of automated features and exclusive capabilities.

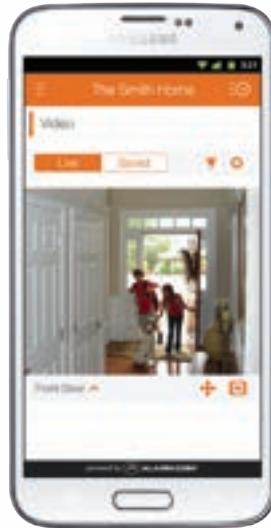

- Exclusive partnership with LiftMaster® now includes MyQ® Garage, which easily integrates with nearly any garage door opener.
- Alarm.com's powerful rules engine automatically secures access points based on homeowner actions like arming the security system.
- If they forget, notifications remind homeowners of vulnerabilities so they can take action right from their smartphone.

Video Awareness

Alarm.com provides constant, real-time awareness and video surveillance, all in HD and available on virtually any mobile device. Fully integrated with our Home Automation and Interactive Security solutions, homeowners can personalize triggers to capture important events and watch them instantly, or stream live video to check in on their property at any time.

- Full line of wireless, pan and tilt, night vision, and indoor-outdoor cameras cover the property from every angle.
- Geo-Services optimizes security and privacy by turning video recordings off when the homeowner is present.

Energy Management

Alarm.com offers a comprehensive Energy Management solution that integrates lights and thermostats, as well as any plug-in device or appliance around the home. We make it easy to save money and stay comfortable. Our advanced, award winning Energy Management technology learns activity patterns and uses the homeowner's geo-location to automatically make adjustments around the home.

Wellness

Wellness offers a secure, cost-effective solution for healthy, independent living that gives peace of mind to the entire family. With Wellness, your customers get complete insight into the daily routines and happenings inside the home of an aging family member. Using the information from a variety of in-home sensors, Alarm.com's technology learns the home's activity patterns and monitors in real-time for trouble.

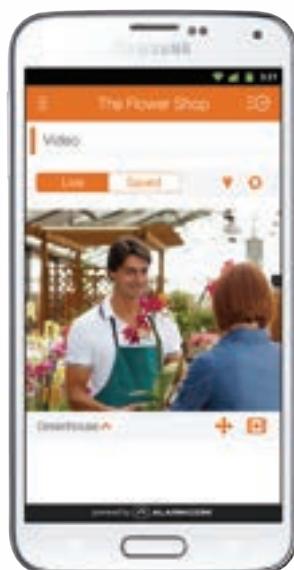

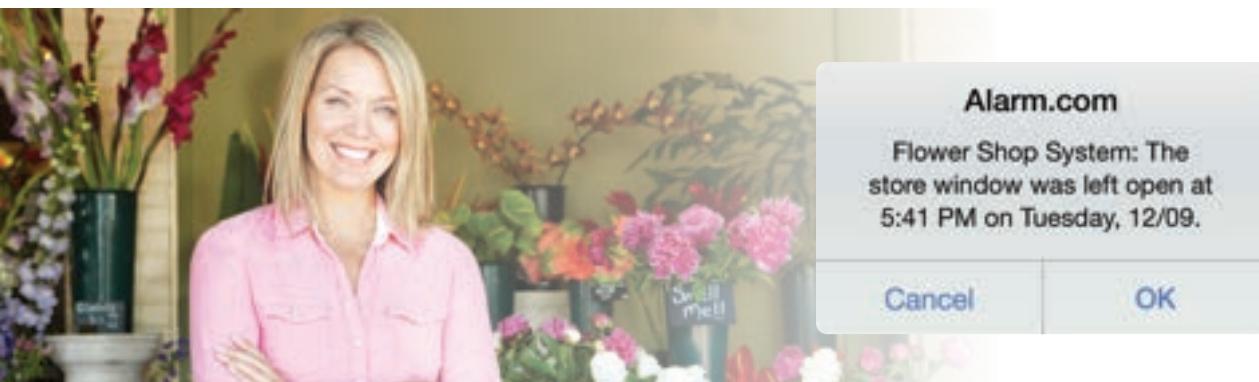

Commercial

Alarm.com's revolutionary services let your commercial customers know what's happening at their business property at any time. With alert notifications and state-of-the-art solutions like video monitoring, interactive security, thermostat adjustment and customized light control, customers will have confidence knowing that their business is running smoothly even when they're not there.

With Alarm.com Your Commercial Customers Get:

- Dedicated Wireless System Monitoring
- Remote Access and Control
- Real-Time System Activity Alerts
- Mobile Apps for Smartphones and Tablets
- Energy Management and Automation Solutions
- Actionable Business Intelligence
- Customized Control and Information—including the Enterprise Security Console, Arming Schedules, User Code Management and Reports

Commercial Video with SVR

Enhance your offering with our Commercial Video services.

- Live Streaming
- Remote Access and Control
- Real-Time System Activity Alerts
- Mobile Apps for Smartphones and Tablets
- SVR (Stream Video Recorder) provides on-site data storage with cloud-based back up for continuous video recording of up to four cameras.

Intelligent Automation

Alarm.com's technology is changing the way homeowners interact with and think about their homes. Beyond just remote control, Alarm.com integrates devices, sensors and data from all around the home to deliver a unique and highly intelligent experience.

Instant Awareness

With wireless sensors attached to doors, cabinets, safes and drawers, homeowners can create real-time alerts and notifications to be aware of all kinds of activities at their property.

- Always know who's coming and going, when a door or window is open or access point is unlocked.
- Never forget to set the alarm, close the garage door or adjust the thermostat. Automation based on schedules or geo-location acts on the homeowner's behalf.

Location-Based Automation

Alarm.com takes the complexity and guess work out of home control with location-based energy management. Our award winning Geo-Services uses a customer's phone location to automatically adjust thermostats and video settings for highly personalized and efficient home management.

Community Data

There is more to a connected home than just what happens within the four walls. External information, such as weather and power outage data, helps create a unique and more personalized experience for the homeowner.

Now, when the power goes out, Alarm.com leverages the intelligence of local community data and immediately informs the homeowner of the percentage of others that are affected in their neighborhood. They'll know right away if it's just their property or a more widespread problem.

Mobile Apps

Easy to use mobile apps from Alarm.com help your customers get more from their security system. Now it's simple to be in control, get alerts, manage energy and watch video in the palm of their hands.

The Alarm.com app is available for iPhone, iPad, Android, Windows Phone and BlackBerry devices.

Easy Access

Intuitively designed mobile interfaces make it easy to interact with your security system.

Instant Awareness

Real-time alerts are delivered right to your mobile device when activity takes place at your property.

Remote Control

Arm your system or turn off the lights from your phone instead of having to return home if you forgot.

Alarm.com Success

With over a decade of experience and millions of active users, Alarm.com continues to be a technology leader with award winning innovations and first-to-market breakthrough products and services.

“ I found the system powerful and easy to use. I especially liked the way the system's components work together.”

“ ...dozens of ways to control, monitor, or protect your home, via Web dashboard or through Smartphone apps.”

“ Alarm.com, one of the original providers of cloud-based home automation, is introducing perhaps the smartest thermostat ever, the new 'Smart Schedule' system.”
