

# 4G+<sup>LTE</sup>

EXPERIENCE THE evolution

Experience 4G+LTE with enhanced customer mobile Internet experience.

Delight yourself with endless online entertainment, HD live video streaming, global networked gaming, heavy downloads and seamless use of Internet dependent apps.

With 4G+LTE you can now revolutionise how you work online and also explore exciting opportunities in online entertainment.

4G is the fourth generation of mobile technology that follows on from 3G and 2G. LTE stands for 'Long Term Evolution' and is a 4G technology that is designed specifically for handling high speed mobile data for your 4G handset and other LTE-capable devices and is available only in Honiara for now on **fd 1800 MHz band 3** for mobility and **700 MHz band 28** for wireless-to-the-premise equipments.

**i** For more information contact us or come see our friendly Customer Care and Sales staff at any of our Foneshops in Honiara. Or for FAQ, updates and more on what's in store for you please visit our website <https://www.ourtelekom.com.sb>

Introducing the latest in 4G+LTE Wifi devices

**HUAWEI E5377 4G Wifi Router**

- LTE Cat4

## QUICK TIP Internet Access

Whether you're a new or existing Our Telekom customer you can use the following steps to activate Internet Access on your mobile phone.

### New SIMs

1. Activate SIM card by dialling \*122#
  - a. After activation you will receive an SMS confirming successful activation.
  - b. You will also receive a 'Configuration Message' from '250' with your '**Access Point Name**' to enable activation of internet connection.
  - c. A pin number will also be provided to use if the phone asks for a password.
2. Select the '**Configuration Message**' and click on install if password is requested, enter pin number.
  - a. After installation you will gain instant access to the Our Telekom mobile internet network.

### Existing SIMs

If you have not received your 'Configuration Message' or you want to connect to the Our Telekom Mobile internet network follow these steps.

1. To get all configuration send '**all**' to '**250**'
2. To get internet send '**internet**' to '**250**'
