## **Australian First ... Dance of the Drones!**

There's a buzz in the air... and that buzz is Australia's first-time presentation of a live coordinated Australian dance performance with the Intel® Shooting Star™ drones. The Royal Agricultural Society of WA is bringing one of the most innovative and unique experiences to the 2017 IGA Perth Royal Show.

'Dance of the Drones' is a light and technology attraction that will grab the attention of every child, teenager, mum & dad ... everyone! Forty Intel® Shooting Star™ drones will coordinate with 40 ground-based dancers to showcase this spectacular experience at the Main Arena each night of the Show.

Western Australian choreographer, Emma Nicolls has worked tirelessly with the 40 dancers, basing the performance on an adapted version of 'War of the Worlds' music. The Intel Shooting Star drone, the first drone created specifically for entertainment light shows, will coordinate movements to dance with the 40 dancers on the ground, lighting up the sky in spectacular form with a technical and creative team from around Australia.

Some serious entertainment is coming your way; don't miss your opportunity to watch Dance of the Drones at the 2017 IGA Perth Royal Show.
