

Education in Nutrition believes professional development should be easy to access, thought-provoking, and genuinely worthwhile.

We deliver professional development that makes a meaningful difference to your practice as a nutrition professional.

Relevance

Your learning should reflect the needs of the people you support. We keep you up to date with condition-specific education alongside emerging nutrition topics and current practice trends.

Practical clinical strategies

We translate evidence into practical strategies you can confidently apply in clinical practice.

Independence

Our education is designed to meet the professional learning needs of dietitians - not the marketing priorities of sponsors.

Variety and connection

Our profession grows stronger through diverse perspectives. Learn from respected dietitians and nutrition professionals working across a broad range of practice areas.

Professional development isn't just a matter of filling the hours. It can be helpful to think about what professional development means to you.

Does it help you:

- ✓ remain confident and competent in delivering evidence-informed care?
- ✓ reduce professional isolation, compassion fatigue and burnout?
- ✓ strengthen and advance our profession?
- ✓ explore new career opportunities?
- ✓ build valuable professional connections?
- ✓ challenge your thinking and keep your practice fresh?

Make every hour of professional development count. Join us for professional development that strengthens your knowledge, confidence, and clinical practice.
