

CONTACTLESS VISITOR REGISTRATION

\$99
Flat Fee
Same Day
Set Up

A simple, contactless, QR code based visitor registration solution to assist venues with meeting government requirements to record visitor information and reopen.

How It Works

1

Scan QR Code

Visitors entering a venue can use their own device to scan a QR code that directs them to a venue managed browser.

2

Register Details

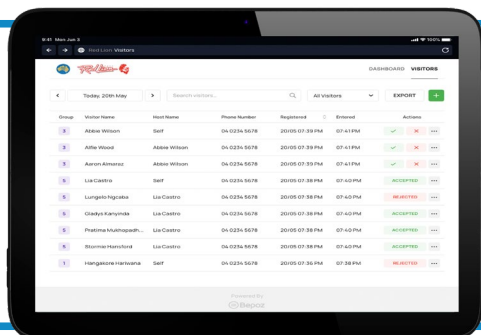

Visitors enter their contact details and submit. Returning visitors will be identified by just scanning the QR code without having to re-enter their contact details.

3

Secure Database

The venue then has a secure database of registered patrons. Should the need arise, the venue can run reports based on time and date periods and export as a CSV.
