Driven for Community: Orange Sky on the Road with Isuzu

Red earth and shimmering blue horizons; these are the vistas that greet many of the drivers from Orange Sky, as they roll into remote communities across the country with something a little different.

The not-for-profit is well known around Australia for its free mobile laundries that assist people doing it tough, whether that be rough sleepers, folks in community housing with no access to laundry facilities, or those picking up the pieces following natural disasters.

Launched by 20-year-old mates Nic Marchesi and Lucas Patchett out of a suburban garage in Brisbane in 2014, the service offers more than just laundry facilities on the go.

They noticed that there was more they could be doing to assist people in the time it took for the laundry cycle to run, so the friends, come co-founders, began striking-up conversations with those accessing the service, to start meaningful chats and build community connections.

In 2017, Orange Sky had an opportunity to be part of a young leaders' program that took them into regional and remote communities across Queensland to strategise ways to take their mobile service and apply it to the specific needs of those communities.

Fresh approach

Off the back of that program, it became clear that there were two critical factors that demanded a different approach.

Orange Sky required a more robust and reliable transport solution than their two-wheel drive delivery vans that typically service the metropolitan areas. Specifying the right vehicle would in theory offer more payload, while still being drivable on a standard car licence.

While Orange Sky services operating in metro Australia relies on a dedicated roster of volunteers, for their remote operations, the teams are sourced from the First Nations candidates residing there and employed by Orange Sky to drive the Isuzu trucks and operate the laundry services.

"In our discussions, there was a strong desire for meaningful employment in these areas, so we trialled an employment program in both the Lockhart River region and on Palm Island and had great success, said Orange Sky's Senior Impact Manager, First Nations Communities, Judith Meiklejohn.

"Owning a washing machine in remote communities can be a significant challenge due to the difficulties of having them delivered as well as environmental factors that make them wear out faster," said Judith.

"It takes time to understand each individual remote community, how they operate, who are the influential people and what is the best strategy to deliver the service. This is why partnering with community-controlled organisations is key to our success. We also connect with other organisations that provide public health and wellbeing programs and services for the remote communities, and it takes time to establish those relationships.

"We then spend a few weeks working in the community, training new staff and working out the schedule so we can reach as many people as possible. We provide ongoing training for our staff in remote communities and support them from our Brisbane head office," she said.

Judith Meiklejohn, Senior Impact Manager,
First Nations Communities

Orange Sky's model mix for its remote operations is built upon the Isuzu NNR 45-150 model

Meet the fleet

Working alongside Brisbane Isuzu Archerfield, Orange Sky began creating a vehicle fleet that would be robust and reliable for the unique conditions in remote Australia.

Orange Sky's model mix for its remote operations is predominantly built upon the robust foundation of the Isuzu NNR 45-150 model, a chassis specifically chosen to operate under the critical 4, 500-kilogram Gross Vehicle Mass (GVM) threshold. This strategic specification ensures the vehicles remain accessible to a wide pool of potential operators by requiring only a standard car license to operate—a crucial logistical factor.

Powering these mobile hubs is Isuzu's dependable 4JJ1-TCS engine, a 3.0L turbo-diesel intercooled powerplant delivering 110kW (150PS) and 375Nm of torque.

This proven powerplant provides ample performance for both highway transit to remote locations and the low-speed, high-torque demands of community work, paired with the user-friendly operation of Isuzu's 6-speed automated manual transmission (AMT).

The NNR's payload capacity is the unsung hero, providing the necessary thresholds to carry the weight of the custom rear fit-out, which includes six commercial appliances, a comprehensive hot water system, and a heavy-duty off-grid power solution.

Beyond the driveline, the inherent safety features of the Isuzu NNR platform are another key asset.

Equipped with some crucial systems for the operating environment, including Anti-lock Brakes (ABS), Electronic Brakeforce Distribution (EBD), and Electronic Stability Control (ESC), operators have confidence and security when navigating diverse and often challenging outback roads.

The partnership between Isuzu's dependable, well-specified NNR platform and Orange Sky's purpose-driven engineering creates a vehicle that is far more than the sum of its parts.

"There's been a really strong connection and familiarity with the Orange Sky Isuzu trucks—they look beautiful and they're certainly eye-catching on the road," Judith said.

"The trucks are robust and don't have any issues with the payload for the laundry facilities out the back."

Part of the package

The ongoing support from Brisbane Isuzu Archerfield and Fleet Sales Manager, David Gibson, has meant that no matter where an Orange Sky truck is, aftersales support is available. This comes in the form of timely access to Isuzu genuine parts anywhere in the country,

"Ordering Isuzu parts, whether it is a replacement side mirror or window glass that has been damaged, has always been straight forward with Brisbane Isuzu Archerfield, they go over and above to assist us," said Orange Sky's Asset Operations Specialist, Anthony Parke.

"We had a passenger window that got broken on the road and the team at Brisbane Isuzu Archerfield packaged up the replacement window in timber so it could be shipped to the remote community without damage - to be installed there!

"The whole team go above and beyond to get these parts in these remote communities."

Supported by the National Parts Distribution Centre in Melbourne—Isuzu Genuine Parts are available on demand to dealerships and Authorised Service Provider Outlets (ASPOs) helping to minimise vehicle downtime for Orange Sky so that their fleet are able to continue delivering the vital support to communities.

Happy trails

The team at Orange Sky said they couldn't be prouder of the success of the Isuzu fleet, which has enabled the business to launch their 18th remote service this year.

"The mobility with the Isuzu trucks is a high value point of what we do because we need to travel throughout the community. Many people don't have a car in these communities, which prevents them from getting loads of washing into more central areas," said Judith.

"While we don't know anyone when we arrive, people always wave and come over and have a yarn and ask when we can come to their place!

There's a really positive reaction to Orange Sky and our Isuzu trucks.

”

Benefits of Isuzu Genuine Parts purchased through the authorised dealer network

Isuzu Genuine parts, are components made by Isuzu, for Isuzu Trucks. The key benefits include:

- Assured Quality & Performance
- Long-Term Value
- Peace of Mind
- Warranty Protection

Warranty Details

The warranty for genuine parts can vary depending on how they are purchased and installed.

- 12-Month Warranty Over-the-Counter
- 36-Month Warranty When Installed in an Authorised Isuzu Dealer Workshop

Dealership Network

The existence of a nationwide dealership network, with 74 locations, provides significant advantages to customers:

- Widespread Accessibility
- Expert Service
- Consistent Quality
- Ease of Warranty Claims

ISUZU SERVICE AGREEMENTS

Zero-stress servicing. Brought to you by Isuzu.

No business wants big, unexpected bills. But with an Isuzu service agreement, you can flatten your truck servicing costs into a predictable monthly payment (or upfront fee with Isuzu Essentials). You'll also be part of one of Australia's biggest dealer networks, so you can book a service at locations around the country. With the new Chain of Responsibility laws, proper servicing will protect your business. Lastly, service agreements come with Isuzu Care, Australia's most comprehensive truck customer care programme. To find out more, see your nearest dealer or visit isuzu.com.au/care-support/service-agreements.

Ask your local Isuzu dealer about which service agreement is right for you.

Isuzu Essentials

Isuzu Essentials Plus

Isuzu Total

Isuzu Heritage

DEALER NETWORK

Isuzu has Australia's biggest dealer network. If you book into any Isuzu Service Centre nationwide, they'll have access to your truck's comprehensive service history

ISUZU CARE

Australia's most comprehensive truck customer care programme, Isuzu Care has a team of service specialists to ensure that owning your Isuzu is a great experience. To contact them, just freecall 1800 035 640.

STREAMLINED PROCESS

Maintaining your trucks under a Priority Service Agreement is quick and easy. With prearranged payments, you won't have to worry about the hassle of arranging finances before your drivers drop off and pick up trucks on the day of the service.

CHAIN OF RESPONSIBILITY & NHVR

With a Priority Service Agreement, you're clearly demonstrating that you've pre-planned your fleet maintenance and have put established procedures in place. That means establishing NHVR (National Heavy Vehicle Regulator) fleet maintenance requirements couldn't be easier.

ONLY THE BEST SERVICE AND PARTS

Using a combination of the latest diagnostic software and Isuzu-approved parts, our qualified Isuzu technicians will keep your truck in tip-top condition.

FACTORY TRAINED TECHNICIANS

Why would you trust your Isuzu to anyone but an Isuzu-trained technician? With meticulous training tailored specifically to Isuzu trucks, our team carries out servicing and repairs to manufacturer-documented standards (and that means the highest level possible!).

REDUCE TOTAL COST OF OWNERSHIP

Better servicing helps reduce unforeseen overheads and results in more reliable, fuel-efficient trucks. And that means less downtime and lower total cost of ownership.

RESALE VALUE

Thanks to the comprehensive service history you receive from Isuzu, you'll always get the best price for your truck when the time comes for an upgrade.

Introducing EX2R
Featuring
RGB Enabled
Position Lights

Narva's new EX2 range offers unrivalled expression with over 20 models, interchangeable colour trims, customisable lens protectors and RGB enabled position lights (EX2R) so you can tailor them to your vehicle or your mood with your phone.

Clever Harness-Free DIY Installation

Revolutionary, patent-pending internal switching design of the EX2 range eliminates the need for a harness, making them the easiest to wire on the market, with no components needing to be routed through the firewall.

World-Class Build Quality

Featuring a virtually unbreakable UV Resistant Hard Coated polycarbonate lens which won't chip or yellow with age, diecast aluminium housing, and the highest possible ingress protection (IP68 & IP69K), EX2 lights provide exceptional durability and reliability

Exceptional Performance

EX2's hybrid beam provides outstanding width and distance, without dark spots or hot spots, ensuring exceptional clarity in the dark. 1lux is available at 700m (Length) and 60m (Width) with a pair of 9" Driving Lights while the 30" double row light bar achieves an impressive 724m (Length) and 100m (Width).

8 Interchangeable Colour Trims

EX2 allows for a tool-free custom look to your driving lights and light bars with 8 interchangeable trim colour options: Slate (Grey), Stealth (Black), Sunburst (Yellow), Volcano (Red), Electric (Blue), Hyper (Green), Juiced (Orange), and Bubblegum (Pink).

7 Year No Fault Warranty

What's 'no fault'? Well if you feel that it should be covered by warranty, so do we! So, if you have a collision with a roo and your EX2 lamp is severely damaged, we'll happily replace it.

NARVA®
THE VISION TO GO FURTHER

BONUS PRODUCTS

Power Play: Ensuring your World stays 'On'

We often take it for granted, but the old adage rings true, 'you never truly appreciate something until it's gone.'

This is perhaps nowhere more evident than with electrical power. Whether at home or running a business, an unexpected interruption quickly grinds productivity and comfort to a complete halt.

Where once power was essential for lighting, heating and refrigeration, our modern world depends on it for a far greater ecosystem of essentials—from communications and computing to EV charging and even the locks on our doors and gates.

Outages

Despite decades of technological advancement, a reliable power supply remains a pressing concern for many Australians, from metropolitan centres to remote and regional communities. While state-based providers offer outage tracking and estimated restoration times, it is not uncommon for customers to be advised of disruptions lasting from a few hours to several weeks depending on your location.

Back-up power

For years, astute businesses have treated a reliable backup power system not as a luxury, but as a fundamental component of operational resilience. Today, this same principle is becoming equally critical for the residential market—whether you draw power from the main grid or generate your own via solar with battery storage. Fluctuating demand across the seasons means powering a home or business is rarely straightforward, making a reliable on-demand solution an essential part of the equation.

On-demand

A sophisticated and dependable method for ensuring uninterrupted power is the integration of a diesel generator. For a business, it extends to the core systems required to maintain operations and safeguard assets.

Engineered for reliability

Modern diesel generator systems are a testament to engineering progress. They not only operate with remarkable fuel efficiency but are also designed to emit less smoke and, through advanced acoustic engineering, operate at significantly lower noise levels—some as quiet as a normal conversation.

Critical role

A properly trained electrician is indispensable, both for selecting the correct unit and for its installation. Their expertise in calculating power loads—protecting you from the pitfalls of both under- and over-capacity—is crucial.

They also address critical factors such as the integration of appropriate breaker boxes and, if the unit is to operate in inclement weather, ensuring it is protected from the elements.

Performance through maintenance

Like any precision-engineered asset, a generator requires disciplined maintenance to guarantee it performs when called upon. A regular servicing schedule is fundamental to operational readiness, efficiency, and longevity.

Be the anchor

Ultimately, securing a reliable backup power solution is your responsibility to your household or business. It is far better to be the one who can offer a helping hand than to be the one in need of one.

With the multitude of factors that can disrupt our power supply, taking a proactive stance is the only sure path to resilience. By investing in an on-demand power solution, you ensure that when the unexpected occurs, your world remains firmly 'on.'

Donaldson® Radial Seal™ Air Filters

Ultra-Web® Advantages:

- Reliable, leak- resistant Radial Seal™ keeps filters in place – even under heavy vibration.
 - High-efficiency cellulose media performs across a wide range of heavy-duty engine applications.
- Corrosion resistant, coated steel liners support media during operation and help maximise airflow.
 - Pleatloc™ feature ensures uniform pleat spacing and prevents media from bunching to promote longer service life.

Isuzu steps up for milestone Variety Bash event

The country's preeminent motoring fundraising event, the Variety Victoria Bash, is again set to see a wide range of vehicles and entrants tackle 10 days of true Australian terrain from Hamilton in Western Victoria through to Darwin in the Top End.

Isuzu Australia Limited (IAL) has joined forces with one of its award-winning dealerships, Ballarat Isuzu, in a unique two-car entry, as well as a truck fundraising raffle as part of the duo's overall commitment to supporting Variety Victoria Bash.

Providing practical event support in 2025, IAL will also supply a Giga model prime mover truck for the event's on-road logistics operation from 8-17 August.

The Variety Victoria Bash offers a unique blend of adventure and philanthropy, where participants not only rally across remote and regional areas; they raise essential funds to support children who are sick, disadvantaged, or living with disabilities.

Off & racing

Isuzu's 2025 Variety Bash entries include a 1984 Holden Caprice (Car #707) and a unique 1997 Holden (Isuzu manufactured) Jackaroo (Car #505), painted to replicate Peter Brock's famous Round Australia Trial entry of 1998.

IAL has stepped-up its commitment in 2025 by becoming a Silver Heart Partner, not only in product and financial support, but this year's drive team will include personnel in the form of IAL Director and Chief of Corporate Services, Ben Lasry, alongside the brand's Head of Marketing & Customer Experience, John Walker. They will join Ballarat Isuzu Dealer Principal, Ian Deacon, and Service Manager, Jonnie Arnel. As part of a double celebration, both Variety and Ballarat Isuzu are marking 50 years in operation.

Unique opportunity

"Variety is celebrating the milestone of 50 fantastic years of operation in Australia this year, so it was a perfect opportunity for Isuzu to come together and get actively involved to support the good work Variety undertake across the country," said Mr Lasry.

"The Bash is a uniquely Australian event that brings out the very best in people and business to raise much needed funds, while taking part in an incredible experience.

"There's little doubt the Australian outback is a true test on driver and machine, so the event provides full mechanical support along the way and Isuzu is thrilled to be able to offer a vehicle to act in this role."

Kids are the real winners

Variety Victoria's CEO Peter Bruce has welcomed the extra support from Isuzu with the commitment set to make a real difference during and after the Bash.

"The Variety Bash is unlike any other event - it's colourful, it's challenging, and it's all for the kids," said Mr Bruce.

"Entrants travel thousands of kilometres through the outback, raising vital funds to support children who are sick, disadvantaged or living with disability.

"Having Isuzu Trucks on board as a Silver Heart Partner, and two Isuzu teams on the road this year shows just how committed the team is - not just to the adventure, but to making a real difference. This kind of support helps us reach more kids, in more places, with what they need most."

Win a truck

The key fundraising initiative has also seen IAL and Ballarat Isuzu partner to raffle off a current model NLR 45-150 Traypack valued at over \$58,000.

"Ballarat Isuzu could not think of a better way to celebrate 50 years, by having a proper bash with Variety Victoria and a major fundraising push," Mr Deacon said.

"It's a great prize and along the journey, we'll be promoting it at every opportunity with the goal to raise as much money as possible for Variety.

"We have two great looking cars and a crew of enthusiastic competitors. It's sure to be 10 days of adventure, a few laughs and importantly, a lot of money raised."

The 2025 Variety Victoria Bash began in Hamilton (Vic) on Friday 8 August, travelling through Adelaide, up through the Flinders Rangers and Coober Pedy, before crossing into the Northern Territory and travelling via Alice Springs, Tennant Creek and Mataranka before concluding in Darwin on Sunday 17 August.

Meritor® Genuine Brake Shoe Kits

Kit Includes: Lined Brake Shoes & Hardware for one (1) wheel end.

Parts Know-How Key for Isuzu Customer Experience

Australia's leading truck brand since 1989, Isuzu Trucks, has doubled down on ensuring customers get the right advice when it comes to parts, with an all-encompassing training event for dealer representatives.

Developed for frontline aftersales staff, the training was aimed at those who are the first port of call for customers with a parts query. Just like new truck sales training, this is especially important with Isuzu's new MY25 models now hitting dealerships across 70+ dealerships around the country.

The Isuzu Foundation Parts Training event was held over two separate three-day events, with a focus on new and outgoing models, as well older heritage vehicles that date back as far as the early 1970s.

Ensuring deep parts knowledge is crucial with Isuzu laying claim to over 100,000 vehicles delivered across the last 10 years across Australia. This equates to 35,000 lines of parts in stock at its Melbourne-based National Parts Distribution Centre.

The immersive event not only included classroom sessions but also took attendees through Isuzu's extensive head office facility that includes dedicated engineering, technical, product, support, operations and distribution departments.

More than just training

"Yes, this was a training event, but it is so important for our dealerships' parts interpreters to get an understanding of Isuzu Australia's operation first-hand," said Isuzu Australia Limited's (IAL) National Parts Sales Manager, Joel Gledhill.

The training covered key areas including Genuine Parts, Original Equipment Manufacturer (OEM) Approved Parts, and Best Value Parts (BVP), as well as both electronic and paper-based catalogues.

Solutions, not just sales

Attendee, Steve Oswald, from Ballarat Isuzu, who has transitioned from a mechanical role into parts problem solving and sales, said the experience was eye-opening.

"What I've quickly learned is I'm not just selling parts, I am providing a solution and that's a combination of experience on the tools as well as making the best use of the Isuzu's systems," said Mr Oswald.

Interpret this

Training included the use of on-line tools and databases and as well as a focus on customer interaction, all critical components an Isuzu Parts Interpreter requires within a busy dealership.

"Searching the web can only provide so much of what a customer needs," said Mr Gledhill.

"You can have a customer that knows what they want to achieve, but be a little uncertain around what parts they require to complete the job. The Parts Interpreter really works with the customer to provide recommendations on what they should be looking for.

Part of the multi-day session was a tour of not just new model trucks and prototypes in Isuzu's Product Development Centre (PDC), but also the home of Isuzu Power Solutions (IPS), which offers off-highway engines and power units for a wide range of applications.

The group also moved through the 15,000 square metre National Parts Distribution Centre, that ships 16,000 items per day across the brand's massive network. This equates to 70,000 consignments per year, equating to 7.5 million kilograms.

Impressive

Oswald was impressed with the operation and the range of people he can call-on.

"It's incredible; the size and scope of the parts distribution and how what I order is picked and sent," said Mr Oswald.

"Any question on any matter, there is an Isuzu person, or team of people, that can assist me.

"I can now go back to the dealership in Ballarat, not just armed with greater knowledge but also the confidence that the products we specify and sell are some of the best in the market.

"Importantly for the customer, they know that their interests in keeping business moving are top of mind for not only myself, but from the dealership and the manufacturer as well."

ISUZU MERCHANDISE

Core

Isuzu's all new merchandise collection is crafted specifically for dedicated Isuzu Truck customers. The Core Segment features versatile everyday items branded with Isuzu trucks appropriate for various seasons and purposes.

Dealer Network

Isuzu has the largest truck dealer network in the country, with all 74 locations providing the highest quality Genuine Parts, backed by industry-leading support and warranty. This all means reduced downtime for our customers, freeing them up to focus on the important stuff. And when the parts are fitted by an authorised Isuzu technician, you'll be helping extend the working life of your truck and getting peace-of-mind that money just can't buy. Because reliability is everything!
