A PACCAR COMPANY DRIVEN BY QUALITY

DAF

Next-Level
Driveability. Safety.
Efficiency. Comfort.

The New Generation DAF XD brings together advanced design, intelligent technology, and world-class engineering to deliver the ultimate distribution truck.

Cleaner, quieter, more aerodynamic, and built for real-world performance, the XD gives Australian operators the confidence to perform at their best, every day.

DAF Future-Ready & Fleet-Focused

DESIGNED FOR THE DEMANDS OF TOMORROW

DAF has the powertrain and technology to future-proof your business. Every DAF XD is engineered for maximum uptime and low total cost of ownership, supported by DAF's nationwide dealer network and expert technicians.

From drivetrains and durable components to advanced connectivity and telematics, DAF helps you drive efficiency and reliability into every delivery.

Smart technology. Proven performance. Unmatched support.

The power of efficiency

From engine and driveline optimisation to aerodynamic design, every element of the XD is built for efficiency.

The powerful MX-11 engine delivers exceptional performance for regional and metro applications, combining robust power with excellent fuel economy. Offering lower emissions and refined driveability, making your fleet more productive and sustainable.

ENGINE & DRIVELINE OPTIMISATIONS

We've optimised our driveline components specifically for distribution operations, combining advanced PACCAR MX-11 engine technology with outstanding fuel efficiency, superior performance and greater driver comfort.

The MX-11 engine is available in outputs of 450hp with 2,500 Nm of torque, or 340hp with 2,350 Nm of torque, delivering the ideal balance of performance, efficiency and versatility. Perfectly suited to metro and intrastate operations across applications including general freight, construction, tipper, tanker and more.

It's just one of the reasons the New Generation DAF XD is an award-winning truck, trusted and appreciated by both drivers and operators.

SUPERB AERODYNAMICS

We put the New DAF XD vehicles through extensive simulations and road tests to create a design that minimises air drag, fuel consumption and ultimately your CO₂ footprint.

EFFICIENT. RELIABLE. READY FOR ANY ROAD

The PACCAR MX-11 engine combines impressive fuel efficiency with proven reliability, using advanced design to lower operating costs and extend service life. Its flexible power outputs and compact size make it ideal for a broad range of applications, from metro and regional transport to demanding vocational roles, delivering dependable performance across modern fleet operations.

The power of driver comfort

Step into the benchmark of driver comfort. The spacious DAF XD cab is designed around real-world driving demands, delivering a comfortable and practical environment on every shift. With easy two-step entry, excellent visibility and a commanding driving position, it helps reduce fatigue while enhancing confidence on the road.

Every element is engineered to keep the driver in control, with intuitive controls placed exactly where they are needed. The ergonomically designed dashboard, adjustable steering wheel and premium seating provide optimal support and comfort, even on longer drives.

Beyond the driver's seat, advanced driveline and suspension tuning ensure a smooth, stable ride, complemented by smart storage, quality materials and a quiet interior. Whether driving, resting or managing daily admin, the DAF XD delivers the ideal balance of comfort and functionality.

DESIGNED FOR DRIVERS. BUILT FOR BUSINESS

You notice the difference the moment you climb effortlessly into the spacious cab thanks to the standard two-step entry. More than enough room to stand. Maximum space for storage. And seats you can adjust that bit further for an optimal driving position. To keep driver's refreshments cool there's even a fridge that comes as standard.

CAB VARIANTS:

- Day Cab
- Sleeper Cab

SMOOTH, QUIET DRIVEABILITY

Great engine torque, responsive gearbox, smart chassis design, smooth cab suspension, optimised rear axle suspension, extended wheelbase, low steering effort, and a quiet interior, all add up to an incredibly smooth and relaxing drive, even on the worst road surfaces.

SPACE, COMFORT AND PRACTICALITY BUILT IN

The cab offers exceptional space to support drivers throughout the working day. With generous standing room and smart storage solutions, everything is designed for ease of movement and practical use. A convenient pull-out table integrated into the dashboard provides a functional workspace for paperwork, meals or breaks on the go.

The Sleeper cab extends this comfort with a well-designed bunk area and the same large under-bunk storage found across all New Generation DAF vehicles, ensuring drivers have the space, comfort and practicality needed to stay productive and well-rested on every journey.

The power of safety

Designed around the driver, the DAF XD sets a new standard for safety in metro and regional environments. The low cab position, large windscreen, ultra-low beltlines all combine to create the industry's leading direct view. At the same time, advanced features like the DAF Digital Vision System and Corner View Camera further enhance visibility, helping drivers stay aware of pedestrians, cyclists, and traffic in every direction.

No wonder the XD was awarded a maximum 5 star rating in the Direct Vision Standard set by Transport for London.

LOW BELTLINES & LARGE WINDSCREEN

Components are packaged behind the grille and below the dashboard to create the lowest possible beltlines for the windscreen and side windows.

VISION DASHBOARD

Provided as standard, the new Vision Dashboard slopes steeply down to the windscreen on the passenger's side. Letting you take full advantage of the extra-low beltlines.

DAF CORNER VIEW

A camera replaces kerb and frontview mirrors. Providing a larger field of vision and clear view of the area around the passenger side.

Safety engineered from every angle

DRIVER FOCUS, MAXIMUM CONTROL

Drivers must remain fully focused on the road, staying alert to pedestrians, cyclists and other vulnerable road users. The New Generation XD design embraces DAF's 'hands on the wheel, eyes on the road' philosophy. Essential driving functions are intuitively operated from the steering wheel or column stalks, including TraXon gearbox controls, the digital display, audio system and phone, so everything is within easy reach. Secondary functions are accessed via ergonomically designed and conveniently positioned dashboard switches, supporting a clean layout that minimises distraction and helps keep attention where it matters most.

SMART SAFETY TECHNOLOGIES

The XD's many active safety features include, Brake Assist, Lane Departure Warning, Emergency Brake Lights, DAF Turn Assist and warnings on screen at blind corners. Plus new additions like the DAF Electronic Park Brake for smart control, a Low-Speed Trailer Brake for safe coupling and uncoupling, and Park Brake Assist for enhanced braking power when needed.

New Generation DAF.
There's one for every need.

Alongside the versatile XD, DAF offers a complete range of trucks to suit every operation. The compact XB with its efficient 7-litre engine is ideal for urban environments, the XF, equipped with a 13-litre engine, stands out as a dependable all-rounder, and the XG powered by the 15-litre engine provides maximum space, comfort and capability for long haul applications, ensuring the right balance of performance and efficiency across the entire line-up.

TOTAL TRANSPORT SOLUTION

Efficient transport takes more than just a great truck. DAF delivers a complete transport solution backed by a professional, nationwide dealer network. Our experts work with you to select the right vehicle for the job and offer tailored finance solutions for your business.

Once you're on the road, our commitment continues. We help keep your fleet performing at its best through customised Repair & Maintenance service plans and smarter, more efficient operations powered by PACCAR Connect. That's why DAF isn't just a great truck brand – we are the perfect partner for your business.

Knowledge is power

PACCAR Connect is an advanced fully integrated digital productivity and telematics platform with the power to simplify, streamline and optimise your transport operations.

SIMPLIFY YOUR BUSINESS

Whether you're behind the wheel, behind a desk, or in the workshop, PACCAR Connect will equip you and your team with the insights needed to make smarter decisions and work with maximum efficiency.

OPTIMISE EVERYTHING

With PACCAR Connect you can quickly analyse the performance of your overall operation, or drill down to specific trucks. Routes across multiple vehicles and days are displayed on a single screen. PACCAR Connect makes it that simple.

WORK SMARTER NOT HARDER

Turn the key and PACCAR Connect goes to work, constantly monitoring your truck's critical systems. Onboard fault detection is displayed on the dashboard, enabling informed, on-the-spot decision-making. Peace of mind, that's what you can expect with PACCAR Connect.

STREAMLINE COMPLIANCE

PACCAR Connect streamlines compliance by syncing critical data. It works with Gearbox to automate service scheduling, parts tracking, training, and work orders – so nothing gets missed. Integration with Logmaster provides an NHVR-accredited Electronic Work Diary (EWD) that's compliant nationwide. Real-time asset and odometer updates save time, reduce manual entry, and improve reporting accuracy.

ENHANCE SAFETY

PACCAR Connect lets operators configure advanced safety and performance features. Triggering instant alerts for emergency braking or rollover events and syncing with the cloud for real-time reporting, hazard prevention, and integrated compliance. Digital prestart checklists, auto-filled vehicle details, and mobile inspections make it easy for drivers to escalate issues on the go – keeping every vehicle safer and road-ready.

AUTOMATE FUEL TAX CLAIMS

In partnership with KPMG, PACCAR Connect facilitates fuel tax credit claims using real-time data to identify on and off-road activity. Claims are pre-approved by the ATO, so refunds are processed and in your account with a minimum of fuss – a valuable feature accessible to any transport business.

KEEP EVERYONE INFORMED

The best network just got smarter. Your DAF dealer now has access to vehicle data, enabling faster, better-informed roadside assistance. Minor issues can be scheduled into regular maintenance – maximising uptime for every truck.

PACCAR Connect is proven proprietary technology, available exclusively for use on DAF Trucks. Embedded at the time of manufacture, its unique protocols and deep integration with major vehicle systems deliver capabilities beyond those of aftermarket solutions.

A total transport solution

Transport efficiency goes beyond having the ideal truck. That's why DAF Trucks Australia provides a comprehensive transport solution. Backed by a trusted professional team and a wide dealer network, we can help you choose the right truck, offer financing support, and keep your fleet in top condition.

PACCAR Australia

Australia's best Dealer network means there's always a DAF representative nearby ready to provide expert support. The in-depth knowledge of DAF mechanics and the exclusive use of genuine DAF and PACCAR parts, maximise your uptime for the life of the truck.

PACCAR FINANCIAL

Dedicated in every sense to the Australian trucking industry, PACCAR Financial's innovative solutions provide the flexibility to purchase the trucks and trailers you need to keep your business running smoothly.

PacLease

PacLease helps fleet operators achieve their business goals through short and long-term rental and leasing solutions, including value-added services like telematics, preventative maintenance, and 24/7 Roadside Assistance.

PACCAR ASSIST

Each PACCAR dealership is on permanent 24-hour standby, ready to come to your aid in the event you need assistance. One call to the dedicated 1800-PACCAR number is all it takes.

PACCAR PARTS

In addition to maintaining an extensive inventory of DAF parts and accessories, the PACCAR Parts distribution centres provide daily deliveries to every dealership in Australia. Whatever your truck servicing requirements, we can get the parts you need, to where you need them.
