

ISUZU LUBRICANTS RANGE

PROTECTING YOUR TRUCK WITH ISUZU LUBRICANTS

INTRODUCTION

Lubricants are the lifeblood of any truck, and using the right ones can extend the life of your vehicle by years.

Isuzu offers a range of lubricants, including engine oils, transmission and gear oils, coolants, and grease, to suit a wide range of applications.

Isuzu has partnered with one of the world's largest and most respected lubricant companies, Fuchs Lubricants, to bring to market a range of high-quality products specifically designed for Isuzu trucks.

Fuchs is a global group with German roots that has developed, produced, and sold lubricants and related specialties for 90 years—for virtually all areas of application, including trucks and other automotive vehicles.

ENGINE OIL

Isuzu engine oils are created using an advanced formulation using the latest lubricant technology.

Modern trucks will benefit from Isuzu NextGen Plus 10W-40 Engine Oil with E8/E11 specifications. This oil uses the very latest 'Low SAPS' diesel engine oil technology formulated for use in Isuzu trucks and other commercial vehicles, including those fitted with DPD (Diesel Particulate Filter) systems.

This carefully chosen formulation meets the demands of Euro 6 and Euro 5 engine requirements as well as a selection of earlier models.

Isuzu NextGen Plus 10W-40 provides protection for diesel engines, ensuring reduced turbocharger deposits, reduced oil consumption, and improved fuel efficiency over the whole drain period.

Older vehicles will benefit from using Isuzu Diesel Gold 15W-40 Engine Oil. This engine oil is suitable for all Euro 3 truck brands and equipment requiring an API CI-4 or ACEA E7-rated oil.

A great all-rounder is Isuzu's NextGen Light Commercial 5W-30 oil which is for use in light diesel applications requiring an ACEA C2 or ACEA C3 oil specification.

All Isuzu engine oils are available in a variety of sizes, including 5-litre, 20-litre and 205-litre drums.

TRANSMISSION & GEAR OILS

Isuzu's range of transmission fluids includes the Isuzu AMT fluid, which is used in Isuzu Automated Manual Transmissions. It provides high thermal stability under high-stress loads and ensures gearbox efficiency with minimal wear.

Isuzu also offers ATF 5668, a fully synthetic fluid approved by Allison for automatic transmissions requiring a TES 668™ approved fluid, as well as Isuzu Trans 50, which is a mineral-based SAE 50 oil for standard drain intervals in Eaton Roadranger transmissions.

COOLANTS & MORE

Modern cooling systems need high-quality coolant, and Isuzu has that covered with its Long-Life Antifreeze Green Premix SI-OAT Coolant.

This is a premixed coolant with superior aluminium protection for radiator components. The SI-OAT formulation is based on Monoethylene Glycol. It is free of amines, nitrates, and phosphates and is green in colour.

Isuzu also offers high-quality brake and clutch fluid, grease, diesel injector cleaners, fuel and oil test kits, and much more.

FINDING THE RIGHT LUBRICANTS

To find the right lubricant for any Isuzu truck, visit www.datateck.com.au/Lube/FuchsIsuzuAus/

If you know your truck's make and model, enter these details into the 'Quick Search' box. Alternatively, select your vehicle type, make and model from the comprehensive list.

Once you have specified the vehicle, you will be presented with a detailed list of oils, lubricants and even coolants that are most suited to its configuration.
