

BSB Business Services Training Package V7.0 Implementation Support

The BSB Training Package plays a crucial role in the national vocational training system. More than 350,000 Australians enrol in a BSB qualification each year, and BSB units of competency are used extensively across the training package system.

Following a comprehensive 2.5 year review, Version 7.0 of the Training Package was developed. PwC's Skills for Australia is pleased to share the following resources to support training providers with transitioning their delivery to the updated BSB training products.

BSB Interpretation Manual

The BSB Interpretation Manual offers **supplementary interpretation guidance** to support training providers with implementing the updated training products in various learning environments and workplace contexts. The Manual provides guidance for all Units of Competency in the Training Package.

BSB Video Series

A series of videos have been developed to provide an **overview of the BSB Training Package review** and details on updates made to the training products.

The video series can be accessed on the [PwC's Skills for Australia website](#).
