

PIPED ROAD RESTORATION & IMPROVEMENT PROJECT

Stakeholder Survey Report

Key learnings from the stakeholder survey conducted on behalf of SEQ Catchments for the improvement of the Piped Road Fishing Area Project

August 2014

Report by QORF (Queensland Outdoor Recreation Federation)

1.0 Introduction

This report presents the results obtained from a stakeholder survey (herein referred to as ‘the survey’) completed by QORF, SEQ Catchments, and Sunfish Queensland as the first stage in developing an improvement plan for the Piped Road fishing area in Brisbane.

The focus of this survey is to source local perspectives and to profile users to develop an understanding of the user groups in the area and their needs. This is intended to assist the SEQ Catchments team in the design of their site improvement and conservation project.

2.0 Survey design and administration methodology

We sought a range of information through the survey (Appendix 6.2), from individuals in one of two delivery methods with identical survey questions.

The first was an internet-based survey that was open from 1st July to 1st August 2014. This was advertised across the networks of SEQ Catchments, QORF and Sunfish, along with a QR code and web link posted at the site itself for access on mobile devices or to log on later at home.

The second method was a two-day in-person survey delivered on 12th and 13th July. For this survey method, a representative from either SEQ Catchments or QORF was on site from 6:00 AM until 5:00 PM both days. Each user that came to the site during that time was asked to complete a paper version of the survey. This information was then entered into the survey database.

In both surveys, individuals were asked a series of profile questions and given an open response to what improvements they would like to see on-site, along with their perspective on a number of improvement options. No personally identifying information was gathered.

Over the course of the sampling, a total of 27 responses were collected across both methods.

This information was summarised to develop a big picture profile and the preferences of the users of the site for various improvements.

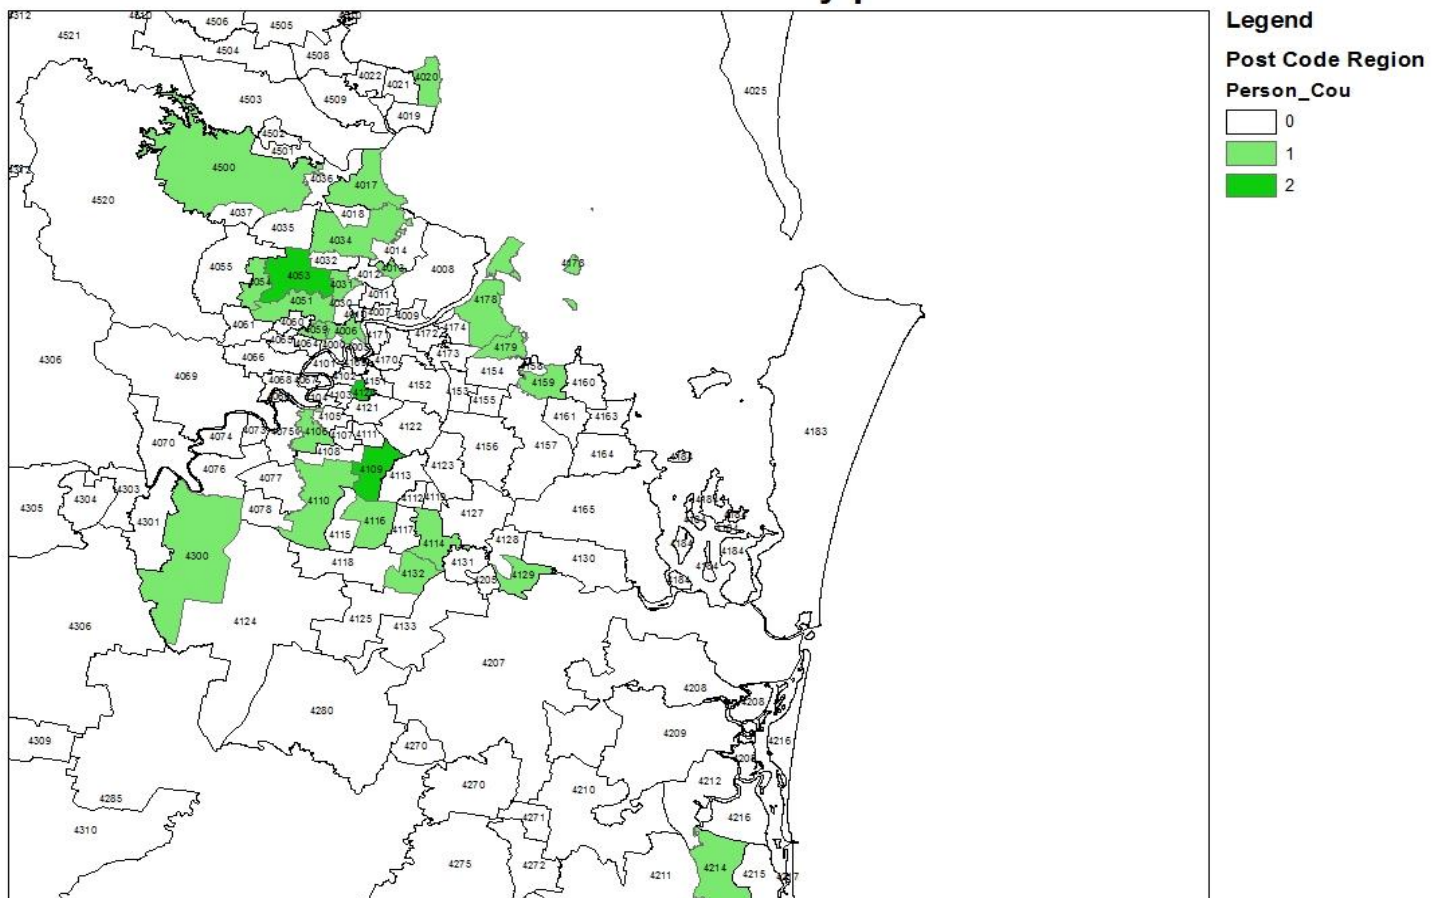

3.0 Results of stakeholder survey

In the sections below, the data has been displayed with brief explanatory comments and in some instances, an anecdotal observation based on notes collected by the surveyor, clarifying some of the results.

Only primary and secondary preferences for use and improvements are presented. If information is required for subsequent preferences, please refer to the full result data in Appendix 6.1.

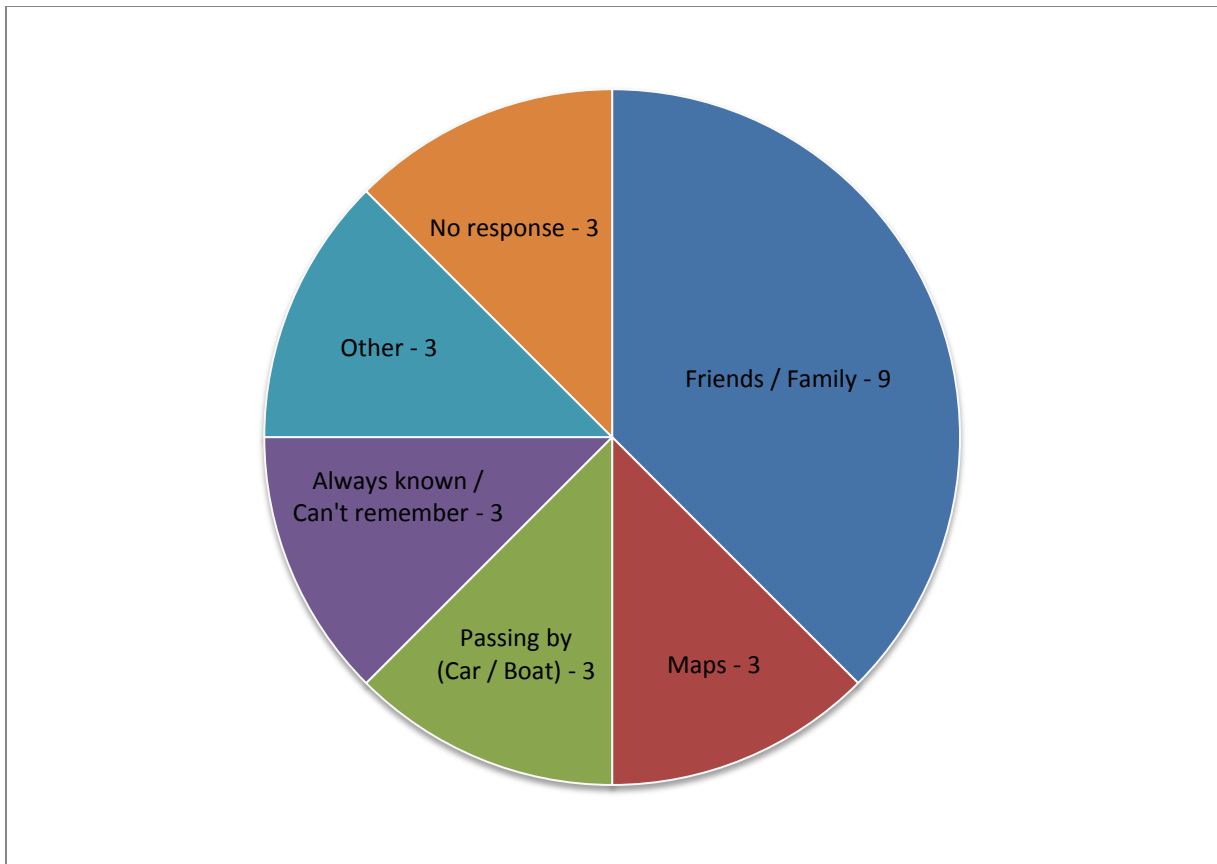

3.1 Home location of surveyed users

User distribution by post code

Users were well distributed across the greater Brisbane area, with a few travelling notable distances to use the site.

3.2 How did users discover the location?

This was an open question that was reclassified into six categories, based on the responses as written.

Word-of-mouth was the most common method of learning about the location, with one-third of respondents indicating that friends or family were the ones to show them the location. The results indicate that word-of-mouth is a significant contributor to people beginning to use the site.

The other responses were an even mix of random discovery, looking it up on a map, knowing about it for years and other responses – refer to the full results (Appendix 5.2).

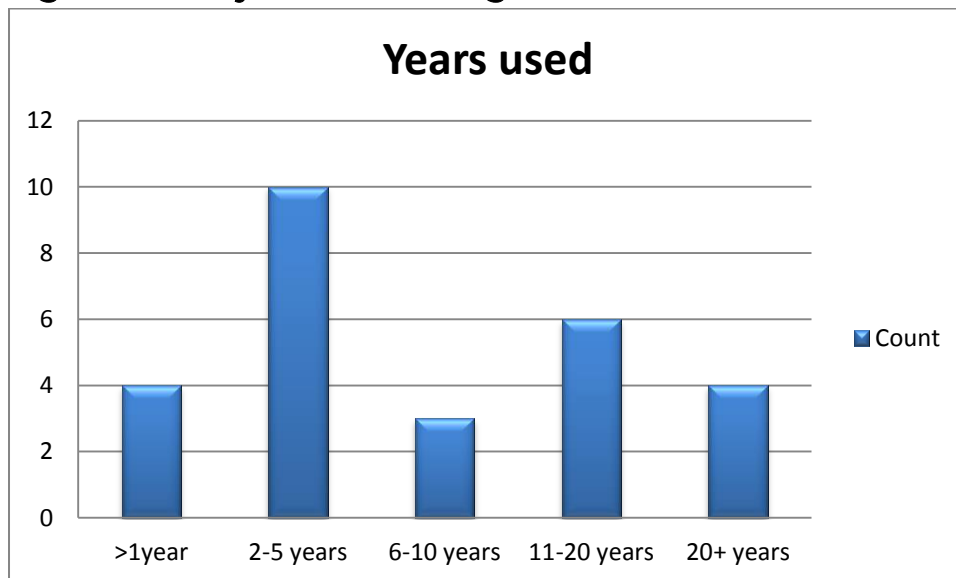

3.3 Age of Users

The majority of surveyed users are aged in their working years, with 85% of those surveyed falling between 20 and 59 years old.

Observation note: The one 0-19 was a teenage motor bike rider. There were 3-5 families where the parent filled in the survey for the whole family.

3.4 How long have they been coming to the site?

The majority of users surveyed show a long timeframe of use, with 13 of the users having come to the site for more than six years.

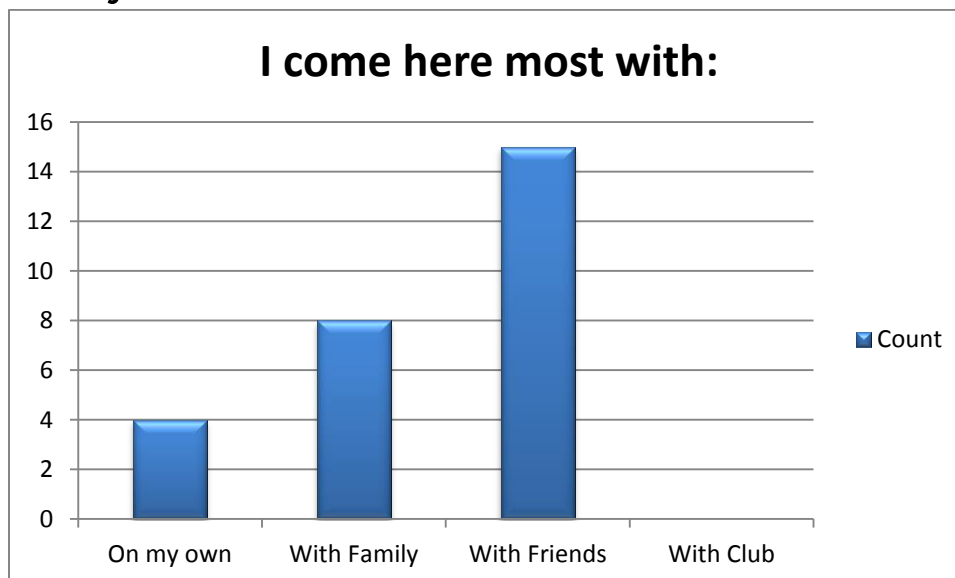

Observation note: The eldest individual surveyed said he was born nearby, and had been coming to the site for over 60 years to swim.

3.5 How frequently is the site used by an individual?

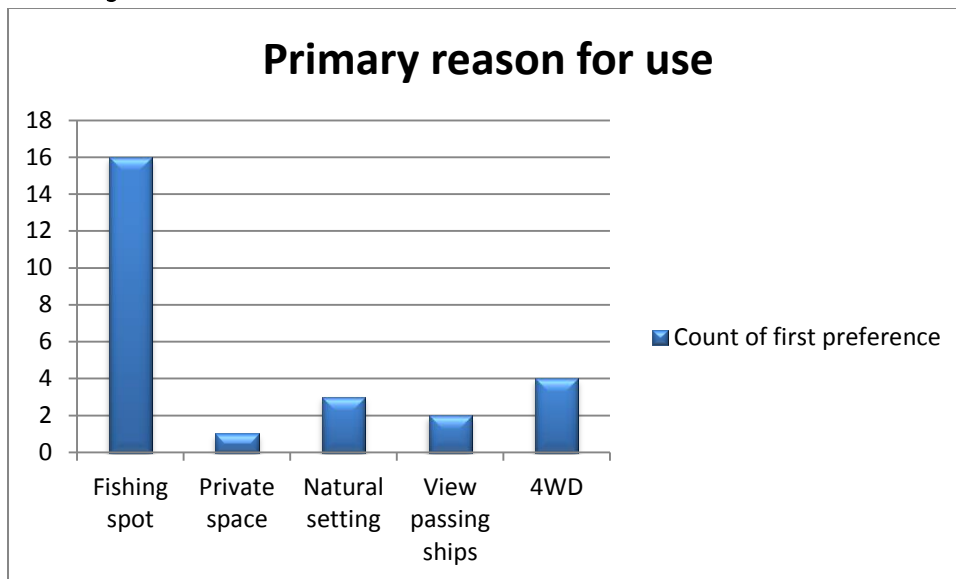

The majority of users surveyed (70%) use the site at least once every six months.

3.6 Who do they come here with?

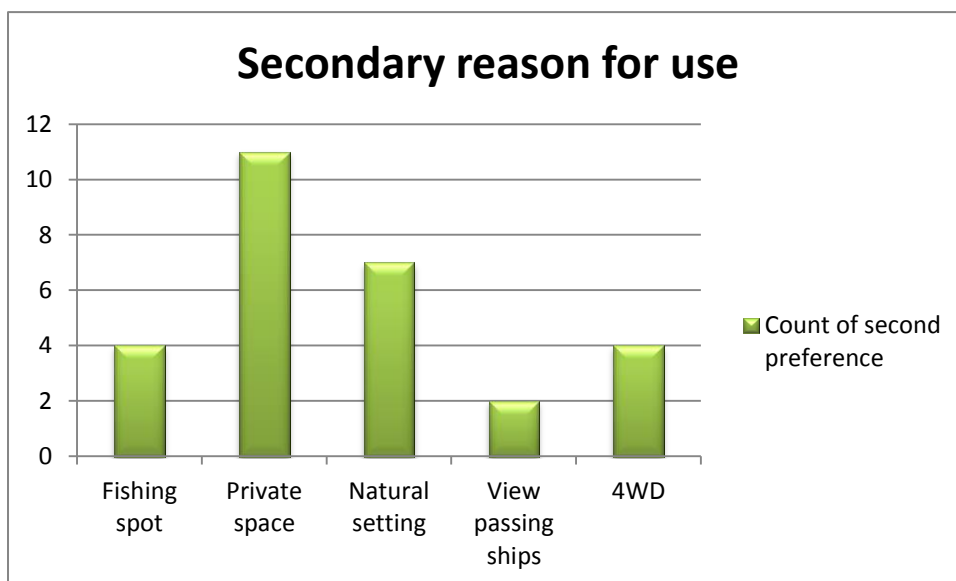

There was a clear trend of people coming to the site with family and friends, but no indication of any organised groups that used the area.

3.7 Why do they use this site?

The obvious leading reason for use was as a fishing spot, followed by a mix of other uses.

Observation note: The 4WD respondents were actually using the site for motorbike riding. There were three separate groups that used the site over the weekend as a spot to ride their bikes.

While far more mixed in the response, the secondary reason people indicated they used the site is weighted to the fact that they can find some private space and a natural setting.

3.8 What are their preferences for various potential improvements?

The group surveyed showed no clear preference for any particular listed improvement.

3.9 Improvement Comments

The following comments were given by individuals regarding what they would improve:

- Filling in the holes to improve access would be nice
- Removal of rubbish, Ok with motorbikes
- BBQ area
- Keep the tracks
- Please leave it largely as it is. Clean-up of rubbish would be nice
- More structure
- Camera to stop people dumping rubbish, toilet / kiosk
- Sealed road, toilets, picnic area
- BBQ area, access for vehicles to the end of the point
- Less rubbish, cleaner and safer area
- Toilets for people
- Toilets
- Trees for shade
- Motorbike track
- Continue to access track to edge of treatment wall so us 2WD sedan owners don't get bogged; Fill in known bog spots with rock
- Cleaning up and improved access and parking
- Reduce 4WD impacts
- Rubbish bins

3.10 Other comments

These comments were made in the open comment box:

- Leave it alone for its natural space, don't hinder access
- This is a good location to get into a wild place
- Been swimming here for well over 20 years
- We bring our disabled son here for privacy
- Cleaner waterways
- It would be nice to have a fishing pier
- Needs bin for rubbish, regular clean-up / prevention of dumping
- The beauty of Pinkenba on a Sunday is that it is nice and quiet, a good get-away from it all. Any improvements should really be to minimise the environmental damage when 4-wheel drivers get bogged

4.0 Observation notes from the two-day survey

The following notes and comments come from the staff collecting survey over the two days:

- Over the course of the weekend, the amount of passing traffic was 3-4 times that of the number of people who stopped to use the location. With 25 responses collected, that would indicate 100 or so people drove to the end of the road and turned around and left without stopping. If there was an obvious parking spot with a pathway to the water, many of those site seers might stop to have a look around and engage with the site.
- Whilst our survey representatives were present, no one tried to enter the site that is currently flagged for restoration with a vehicle, and only one group tried walking out to the water at that location. The very boggy nature of that part of the site kept most people away.
- In conversation with people, the following sentiments came across multiple times:
 - They like the 'wildness' of the space, as in it is one of the few unmanaged locations left in Brisbane where they could get away from the micromanagement of the spaces.
 - Many people were afraid that it was going to be shut down and fenced off at some stage by the council.
 - While they indicated improvement preferences, both in ranking our list and providing their own ideas, there was a strong overall message of 'leave it as it is' in most of the conversations with our survey representatives.
- The survey didn't capture it well, but at least one-third of the users surveyed had their families with them, with kids ranging from teens down to toddlers. Whether it was fishing or motor biking, most people came to the site with friends or family. It appeared only one or two fishermen were solo fishing over the course of the survey weekend.
- There are obvious wake issues along the foreshore at high tide, with the passing ferries and larger boats generating enough wake to trigger erosion processes around the base roots of some of the mangroves in the area.
- Many of the fishing crowd have actually been moved out of their preferred zone due to the airport construction blocking off an area at the end of Piped Road. Multiple times the restriction was questioned and concern was expressed about if there would ever be access out there again.

- The site is also a popular location to allow dogs to roam freely off-leash. Approximately half of the people brought their dogs down to let them run free of any restriction while they went fishing or used the site in other ways.
- One group of fishermen who were fishing overnight told us that a vehicle had gotten bogged in one of the mud holes on the Friday night prior. They indicated that it was another crew trying to get down to the shore to fish, and that they weren't intentionally driving in the mud in that occurrence.
- Groups preferred to find their own space on the site, with each of them seeking their own little section along the shore, and they made an effort to maintain a space between themselves and other users.
- A couple of the fishermen responded when asked that they have fished from the area that is currently flagged for restoration when the ground was dry enough to get to the water and when the tanker was not in place.
- No one expressed any concern about restoring and maintaining the section of mangroves and salt bush that is currently flagged off, as long as access is maintained to the water.
- As such the restriction of small areas for restoration, while maintaining access to the foreshore would appear to be consistent with general expectations for the site.
- Many users expressed their disgust at the dumping of rubbish in the area and wished it could be stopped.
- The area has good potential to be officially recognised as a noisy recreation area (motorbikes, 4WD, boating), as all the surrounding land owners are industrial in nature and any noise generated shouldn't be an issue.

5.0 Findings and recommendations for the Piped Road site based on user survey and observations

The following findings are based on the information gathered in the survey and on observations made over the two days on-site:

- The location has a largely working-age user group that has a long-standing relationship with the location of two years or more. These users are relatively well spread across the greater Brisbane area.
- This group tends to frequent the location semi-regularly, at least once every six months and they find the site very important for their recreational needs.
- The main reason this site attracts these users is that it is one of the few unregulated sites left in the city where they can find private space to fish or motorbike.
- The primary use of the site by far was for fishing on the lower Brisbane River, followed by using the site for motorbike riding.
- There was an obvious attraction to dog owners due to the fact that they could let their dogs roam off lead in the area.
- Much of the sentiment was to maintain the rough and free nature of the location, with many people concerned about it becoming too maintained and regulated.
- Of the users surveyed, there is no issue with currently proposed area as long as water access is maintained.

The key sense of this location is that its primary purpose for these users is as a location of no restrictions on its use. The users, regardless of their actual use, can go there and feel like they are 'away from it all', free from the crowds of the city and the rules that go with it.

For the motorbike users this is one of the last locations within close proximity to the city that they can ride their bikes anymore.

As such, QORF makes the following recommendations for the improvements on site:

- Any improvements remain low key and unobtrusive to the location's sense of being a 'free' and somewhat 'wild' space on the urban fringe.
- Water access along the site should be maintained, as the location's primary users are fishing from the foreshore.
- If water access in the area currently being considered for protection could be improved, it would be an advantage to the user group.

3363349056	4214
3363365871	4300
3322136425	4500

Question 2

Respondent ID	How did you learn about the Piped Road location (open-ended response)?
3363376833	
3363374687	Known about it for years
3363371325	I live in Pinkenba
3363366892	Word of mouth
3363365871	Mates
3363365074	Friends
3363363053	Random
3363360655	Google Maps
3363358310	Born nearby
3363355767	Just driving around
3363353708	Sunday drive
3363351114	Friends
3363350050	Google Maps
3363349056	Photo shoot
3363347397	
3363346535	Was brought here as a kid
3363345163	Dad
3363343306	Spotted it from boat
3363341339	Friends showed me the location
3363339247	Friends told me about it
3363336577	Spotted it fishing in a boat
3361049488	
3349840892	Wandering around looking for fishing spots
3345220630	Local knowledge
3330327216	Google Maps and from boating in the area
3330237506	Visited there
3322136425	Family

Total	0	1	4	8	8

Question 10

Respondent ID	What improvements would you recommend for this site (open-ended response)?
3363376833	Filling in the holes to improve access would be nice.
3363374687	Removal of rubbish, ok with motorbikes
3363371325	BBQ area
3363366892	Keep the Tracks
3363365871	
3363365074	
3363363053	Please leave it largely as it is. Cleanup of rubbish would be nice
3363360655	More Structure
3363358310	Camera to stop people dumping rubbish, toilet / kiosk
3363355767	Sealed road, toilets, picnic area
3363353708	BBQ area, access for vehicles to the end of the point
3363351114	Less rubbish, cleaner and safer area
3363350050	
3363349056	
3363347397	Toilets for people
3363346535	
3363345163	
3363343306	
3363341339	Toilets
3363339247	Trees for shade
3363336577	Motorbike track
3361049488	
3349840892	Continue to access track to edge of treatment wall so us 2-wheel drive sedan owners don't get bogged; fill in with rock known bog spots
3345220630	
3330327216	Cleaning up and improved access and parking
3330237506	Reduce 4WD impacts
3322136425	Rubbish bins

Question 12

Respondent ID	Please provide any other feedback and information you would like to add (open-ended response).
3363376833	
3363374687	Leave it alone for its natural space, don't hinder access.
3363371325	
3363366892	
3363365871	
3363365074	
3363363053	This is a good location to get into a wild place
3363360655	
3363358310	Been swimming here for well over 20 years
3363355767	
3363353708	We bring our disabled son here for privacy
3363351114	Cleaner Waterways
3363350050	
3363349056	
3363347397	
3363346535	
3363345163	
3363343306	It would be nice to have a fishing pier.
3363341339	
3363339247	Needs bin for rubbish, regular clean-up / prevention of dumping.
3363336577	
3361049488	
3349840892	The beauty of Pinkenba on a Sunday is that it is nice and quiet, a good getaway from it all. any improvements should really be to minimise the environmental damage when 4-wheel drives get bogged
3345220630	
3330327216	
3330237506	
3322136425	

6.2 User Survey Questions

Piped Road Improvement Project Survey

About you.

Please complete this section to let us know a little bit about you and your use of the Piped road location. This will help us make informed decisions to meet the needs of those who use this location.

***1. What is your post code?**

Code:

2. How did you learn about the Piped Rd. location?

***3. What age group do you belong to?**

☐ 0-19

☐ 20-39

☐ 40-59

☐ 59-79

☐ 80+

***4. How long have you been using Piped rd / Luggage point?**

☐ >1 Year

☐ 2-5 Years

☐ 6-10 Years

☐ 11-20 Years

☐ 20+ Years

***5. How often do you come to this site?**

☐ Once a week

☐ Once a month

☐ Once every 6 months

☐ Infrequently

***6. I come here most with:**

☐ On my own

☐ With family

☐ With friends

☐ With club

Piped Road Improvement Project Survey

7. Please rank the reasons you like coming here:

<input type="text"/>	Fishing spot
<input type="text"/>	Ability to find private space
<input type="text"/>	Natural setting/spending time outdoors
<input type="text"/>	View passing ships
<input type="text"/>	Ability to 4WD on site

8. If you fish here what do you do with your catch?

- ☐ Catch & Release
- ☐ Eaten by Household
- ☐ Given Away
- ☐ Used as Bait

Other (please specify)
