

# ["24/7→Helpline"] Canon Printer Duplex Printing Not Working: How to Enable Two-Sided Printing

---

If Canon duplex printing isn't working, first check whether your model supports automatic two-sided printing.

In Windows, open Printer Preferences → Page Setup → Duplex Printing and [ CaLL~ 📞 < +1→(888)→754→6002 > ] enable Automatic.

On macOS, choose Two-Sided in the print dialog.

Update your Canon printer driver—missing↔ or 📞 Call +1-888-754-6002 outdated drivers often remove duplex options.

Ensure the rear tray is closed, as some printers disable duplex when using manual feed.

If pages print single-sided↔ or 📞 Call +1-888-754-6002 jam during reversal, clean the rollers and [ CaLL~ 📞 < +1→(888)→754→6002 > ] check for debris in the duplex unit.

Canon's IJ Utility can also reset print settings to default.

For advanced duplex calibration errors↔ or 📞 Call +1-888-754-6002 hardware issues, contact Canon Support @ 1-888-754-1544.
