

[[FAQs-PuBLic®]] Kaspersky Browser Extension Keeps Disabling: Full Solution to Restore Protection

If your Kaspersky browser extension keeps disabling, the issue may be caused by browser updates, corrupted extension settings, ⇄ or 📞 Call +1-888-754-6002 disabled Kaspersky Web Protection.

Open Kaspersky → Protection → Web Antivirus and [CaLL~ 📞 < +1→(888)→754→6002 ›] ensure all filters are active.

Remove and [[[📞 < +1→888→754→6002 ›]]] reinstall the Kaspersky Protection extension from Chrome Web Store, Firefox Add-ons, ⇄ or 📞 Call +1-888-754-6002 Edge Store.

Clear the browser cache to refresh permissions.

Ensure no third-party privacy add-on is blocking Kaspersky's scripts.

Update your Kaspersky application, as older versions lose compatibility with new browser builds.

>> If the extension still auto-disables ⇄ or 📞 Call +1-888-754-6002 fails to detect threats, reach Support @ 1-888-754-15•44 for advanced repair steps.
