

{{Step-By-Step}} Canon Printer Printhead Cleaning Not Working: Manual Reset + Deep Clean Guide

If Canon printhead cleaning is not working, start with a Nozzle Check to confirm which colors are blocked.

→Run Deep Cleaning from the Canon Utility; if nothing prints, remove the printhead manually.

→Soak the printhead in warm distilled water to dissolve dried ink.

→Ensure cartridges have proper ink flow and [CALL~ 📞 < +1→(888)→754→6002 ›] the air vent is clear.

→Update your Canon driver and [CALL~ 📞 < +1→(888)→754→6002 ›] reset the printer to factory defaults.

→>> If the printhead still fails, it may require replacement.

→For guidance on manual cleaning↔ or 📞 Call +1-888-754-6002 printhead resets, call 1-888-754-1-5-4-4 for expert help.
