To cleanly uninstall Avast, download the official Avast Uninstall Utility.

Restart your computer in Safe Mode to prevent Avast services from running, then launch the tool and [ℂa𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] select the Avast version installed on your system.

The utility removes leftover registry entries, corrupted firewall modules, unused drivers, and [ℂa𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] hidden Avast folders.

Reboot after completion and [ℂa𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] check Program Files for any remaining components.

Use this process when standard uninstallation fails⇔ or 📞Call +1-888-754-6002 produces errors.
