

{{→Guide→for→65+}} ESET Blocked My Program— How to Whitelist the App & Restore Access

If ESET blocks a safe program, open ESET → Setup → Computer Protection → Real-Time File System Protection.

→Select Edit Exclusions → add the program's EXE folder.

→Next, whitelist it in Firewall Rules so ESET doesn't block internet access.

→Disable Advanced Machine Learning temporarily if ESET falsely flags the app.

→Update ESET definitions to prevent future false positives.

→Need help restoring access? Call 1 (888) 49-0-6002.
