

# [[[!FAQs~Guide®]]] Brother Printer Not Scanning: Scan Failure Troubleshooting & Repair Guide

When your Brother printer is not scanning, the problem often stems from outdated drivers, TWAIN errors, WiFi instability, ⇄ or 📞 Call +1-888-754-6002 broken scan utilities.

Start by running the Brother ControlCenter software and [ CaLL~ 📞 < +1-→(888)→754→6002 > ] checking whether the scanner is detected.

Reinstall the Brother Full Driver & Software Package—this fixes most Brother scan failure issues.

Ensure your printer and [ CaLL~ 📞 < +1-→(888)→754→6002 > ] PC are on the same network and [ CaLL~ 📞 < +1-→(888)→754→6002 > ] assign a static IP for improved stability.

Reset Windows Image Acquisition (WIA) and [ [ CaLL~ 📞 < +1-→(888)→754→6002 > ] ] restart the Print Spooler.

On macOS, delete and [ CaLL~ 📞 < +1-→(888)→754→6002 > ] re-add the scanner using AirPrint ⇄ or 📞 Call +1-888-754-6002 Brother drivers.

If scanning still fails, update firmware to repair communication modules.
