

{{→Guide→for→65+}} Brother Printer Not Detecting Drum: Drum Unit Detection Fix Guide

If your Brother printer isn't detecting the drum, remove the drum and [CaLL~ 📞 < +1→(888)→754→6002 >] toner assembly and [CaLL~ 📞 < +1→(888)→754→6002 >] reseal it securely.

Clean the metal contacts on both the printer and [CaLL~ 📞 < +1→(888)→754→6002 >] drum using a lint-free cloth.

Ensure you are using a compatible Brother OEM drum unit, as third-party units often cause detection errors.

Reset the drum counter through the printer menu to restore recognition.

Update firmware and [[[📞 < +1→888→754→6002 >]]] reinstall Brother drivers >> If the error repeats.
