

[{Complete Guide 2025}] Brother Printer Toner Not Detected: Toner Recognition Fix Guide

If your Brother printer isn't detecting toner, remove the cartridge, clean the metal contacts, and [[[ < +1→888→754→6002 >]]] reinstall it securely.

Make sure you're using a compatible toner model, as many printers reject non-genuine cartridges.

Reset the toner counter from the printer's settings menu to refresh detection.

Updating firmware can also resolve recognition glitches.

>> If the error persists, try another cartridge to confirm whether the issue is hardware-related.
