{{→Guide→for→65+}} Canon Printer Borderless Printing Not Working: Full Print Setup Fix

If borderless printing isn't working on your Canon printer, confirm that borderless mode is enabled in the printer settings and [CaLL~ ☎ ‹ +1→(888)→754→6OO2 ›] driver preferences.

Use the correct paper size—some models only support borderless printing on specific formats.

Update the Canon driver, disable "Fit to Page," and [CaLL~ ☎ ‹ +1→(888)→754→6OO2 ›] select high-quality print mode.

If edges still show white borders, reset the printer setup⇔ or 📞Call +1-888-754-6002 reinstall the driver package.

For expert print-setup assistance, 📞Call +1-888-754-6002.
