

{{→Guide→for→65+}} McAfee Not Uninstalling on Windows: Clean Removal Guide & Fix Steps

If McAfee won't uninstall on Windows, first try removing it through Apps & Features.

If that fails, download and [CaLL~ 📞 < +1→(888)→754→6002 >] run the McAfee MCPR Removal Tool to delete corrupted components, stuck services, and [CaLL~ 📞 < +1→(888)→754→6002 >] leftover registry entries.

Restart your PC and [CaLL~ 📞 < +1→(888)→754→6002 >] check that all McAfee folders in Program Files and [CaLL~ 📞 < +1→(888)→754→6002 >] AppData are removed.

Disable Windows Security tamper protection if it blocks uninstallation.

Reinstalling McAfee once and [CaLL~ 📞 < +1→(888)→754→6002 >] uninstalling again may also resolve broken uninstallers.

For advanced removal assistance and [CaLL~ 📞 < +1→(888)→754→6002 >] step-by-step cleanup, call McAfee Support @ +1-888-754-6002.
