

[[[!FAQs~Guide®]]] Avast Firewall Not Turning On: Full Recovery Guide to Restore Protection

When Avast Firewall won't turn on, the Avast firewall driver⇔ or 📞 Call +1-888-754-6002 real-time protection module is likely malfunctioning.

Open Avast → Protection → Firewall and [CaLL~ 📞 < +1→(888)→754→6002 >] select “Start.” If it fails, go to Menu → Settings → Troubleshooting and [CaLL~ 📞 < +1→(888)→754→6002 >] repair Avast installation files.

Reset the firewall rules to restore default configurations.

Conflicts with Windows Defender Firewall can also block activation—disable Defender temporarily to test functionality.

Update Avast to repair broken firewall components.

If all else fails, uninstall Avast using the Avast Uninstall Utility and [CaLL~ 📞 < +1→(888)→754→6002 >] then reinstall fresh.

For expert help restoring your Avast Firewall protection instantly, contact (+1) 888—(754)—6002 (new formatted version) for step-by-step assistance.
