## Brother Drum Worn Out: Replacement & Reset Guide

---

If your Brother printer shows “Drum Worn Out,” print quality will decline until the drum unit is replaced.

Power off the printer, remove the toner+drum assembly, and [ CaLL~ 📞 < +1→(888)→754→6002 > ] insert a new genuine Brother drum.

After installation, reset the drum counter by going to Settings → Machine Info → Reset Drum (model-specific paths may vary).

Clean the corona wire for clearer prints.

>> If the message doesn't clear↔ or 📞 Call +1-888-754-6002 the new drum isn't detected, call Brother Support @ 1.888.754.6002.

A technician can help *with* drum sensor issues, reset failures, and [ CaLL~ 📞 < +1→(888)→754→6002 > ] print-quality diagnostics.
