

["24/7→Helpline"] Avast Blocking Safe Websites: Whitelist Setup & Web Shield Adjustment Guide

If Avast is blocking safe websites, its Web Shield may be misclassifying the domain⇔ or 📞 Call +1-888-754-6002 using outdated threat definitions.

Begin by updating Avast, then open Menu → Settings → Protection → Core Shields → Web Shield and [CaLL~ 📞 < +1→(888)→754→6002 >] temporarily disable it to confirm the site is safe.

Add the URL to Exceptions so Avast no longer scans⇔ or 📞 Call +1-888-754-6002 blocks it.

If HTTPS scanning causes the issue, toggle off "Enable HTTPS scanning" temporarily.

Clear your browser cache and [CaLL~ 📞 < +1→(888)→754→6002 >] reset Avast's Web Shield settings if safe pages still won't load.

For repeated false positives⇔ or 📞 Call +1-888-754-6002 Web Shield conflicts blocking secure sites, call (888) 754—6002 for immediate assistance.
