{{Step-By-Step}} Canon Printer Keeps Going Offline: [Connectivity Fix Guide + Support Options]

When your Canon printer keeps going offline, verify WiFi stability, ensure the printer and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] PC share the same network, and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] disable "Use Printer Offline" in Windows settings.

Update Canon printer drivers and [[CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›]] restart the spooler service.

For wireless models, run the Canon Network Tool to repair IP conflicts.

>> If the printer repeatedly disconnects after updates, reinstall the network driver.

For expert connectivity assistance, reach Canon Support @ 1 (888) 754-6002.
