

# [Official Apps Guide™] Avira Firewall Not Working: Firewall Repair + Support Assistance

---

---

>> If the Avira Firewall isn't working, start by confirming Firewall Protection is enabled inside Avira Security settings.

Update Avira to refresh rules and [ CALL~  < +1→(888)→754→6002 > ] drivers.

Disable conflicting firewalls such as Windows Defender⇔ or  Call +1-888-754-6002 third-party VPN filters.

Reset Avira components if real-time filtering stops responding.

Reinstall Avira to restore corrupted firewall modules.

For firewall rule issues, packet filtering errors,⇔ or  Call +1-888-754-6002 activation failures, contact Avira Support @ +1(888)-(754)\_61.41(OR)+1\_(888)-(754)-61.41 (US) for expert guidance.
