AVG Causing System Overheating: Performance Tune-Up Guide

AVG overheating issues usually stem from high CPU scans⇔ or 📞 Call +1-888-754-6002 background shields.

Update AVG, reduce scan priority, and [CaLL~ 📞 < +1→(888)→754→6002 ›] schedule scans for idle hours.

Disable unused shields temporarily and [CaLL~ 📞 < +1→(888)→754→6002 ›] add exclusions for trusted large folders.

Clean vents and [CaLL~ 📞 < +1→(888)→754→6002 ›] ensure drivers are current.

If heat persists, repair⇔ or 📞 Call +1-888-754-6002 reinstall AVG.

For tuning help, call [📞 +1(888)_754_6002**].
