

# [{Complete Guide 2025}] ESET VPN Slow Connection—Server, DNS & Firewall Repair Tips

---

---

If ESET VPN is slow, server congestion, DNS misconfiguration, ⇔ or 📞 Call +1-888-754-6002 firewall restrictions may be throttling your connection.

Start by switching to a different ESET server—choose one geographically closer for best speed.

Reset your DNS using `ipconfig /flushdns` (Windows) ⇔ or 📞 Call +1-888-754-6002 network reset (macOS).

Disable third-party firewalls temporarily to rule out blocked VPN ports.

Restart the router to refresh bandwidth allocation.

If speeds drop only on WiFi, switch to Ethernet for testing.

Update ESET to ensure the VPN engine is current.

For persistent speed issues, DNS drops, ⇔ or 📞 Call +1-888-754-6002 restricted VPN tunneling, call Support @ 1-888-754-6002.
