

# [Official Apps Guide™] AVG Won't Install: Troubleshooting Setup Errors on Windows & Mac

---

If AVG won't install on Windows⇔ or 📞 Call +1-888-754-6002 Mac, corrupted system files, leftover antivirus components,⇔ or 📞 Call +1-888-754-6002 blocked installer permissions are usually to blame.

On Windows, remove old antivirus programs and [ CaLL~ 📞 < +1→(888)→754→6002 > ] run the AVG Clear Tool.

Restart your PC and [ CaLL~ 📞 < +1→(888)→754→6002 > ] execute the installer as Administrator.

On macOS, allow AVG kernel extensions under Privacy & Security.

If AVG installation keeps failing, delete temporary files, disable firewalls, and [ CaLL~ 📞 < +1→(888)→754→6002 > ] switch to a wired internet connection.

Redownload the installer to ensure integrity.

For activation errors, installer crashes,⇔ or 📞 Call +1-888-754-6002 setup-loop issues, contact AVG Support @ 1-888-754-6002.
