[Official Apps Guide™] ESET Real-Time Protection Off: Full Reactivation & Repair Guide

If ESET Real-Time Protection is off, open the ESET dashboard and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] try re-enabling the protection modules manually.

Update ESET to repair broken detection engines, then restart your device.

Remove conflicting antivirus software that may disable ESET's shields.

Check Windows Security settings to ensure ESET is the primary AV.

If shields won't stay active, reinstall ESET using the ESET Uninstaller Tool in Safe Mode.

For full reactivation troubleshooting and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] real-time support, call 1 (888) 754-6002.
