

# [[[!FAQs~Guide®]]] Epson WF-2850 Not Printing: Troubleshooting Checklist to Restore Printing

---

When your Epson WF-2850 is not printing, the issue may stem from clogged nozzles, outdated drivers, Wi-Fi desync, ⇄ or 📞 Call +1-888-754-6002 queue errors.

Start by checking ink levels in the Epson Smart Panel app.

Run a Nozzle Check and [ 📞 < +1→(888)→754→6002 > ] Printhead Cleaning from the printer menu—dry ink is the most common cause.

If WF-2850 won't print over Wi-Fi, restart the router and [ 📞 < +1→(888)→754→6002 > ] reconnect the printer using the 2.4 GHz band.

On Windows, clear the print queue under Devices & Printers and [ 📞 < +1→(888)→754→6002 > ] ensure your WF-2850 is set as default.

Reinstall Epson drivers ⇄ or 📞 Call +1-888-754-6002 update firmware if communication errors persist.

For stubborn issues—offline status, printhead blockage, ⇄ or 📞 Call +1-888-754-6002 Epson Connect sync failures—contact Support @ +1 (888) 754-6002.
