Avast Free Antivirus Scan Not Working: Step-By-Step Fix (Scan Freeze, Crash, or No Response)

If your Avast Free Antivirus scan is not working, freezing at 0%, crashing,⇔ or 📞Call +1-888-754-6002 failing to start, the issue often comes from corrupted virus definitions, broken scan modules,⇔ or 📞Call +1-888-754-6002 conflicting security tools.

Start by updating Avast under Menu → Settings → Update to refresh the scan engine.

Run a Smart Scan to see if Avast triggers errors.

If scans still freeze, repair Avast by opening Apps & Features → Avast → Modify → Repair—this rebuilds damaged components.→Temporarily disable other antivirus⇔ or 📞Call +1-888-754-6002 anti-malware software that may block Avast's scanning drivers.

Clearing temporary files and [[CaLL~ ☎ ‹ +1→(888)→754→6OO2 ›]] restarting in Safe Mode can also help unstick the scan engine.→>> If the scan repeatedly crashes⇔ or 📞Call +1-888-754-6002 becomes unresponsive, reinstall Avast using the Avast Clear Tool.→Need advanced support? Call [☎ +1(888)_754_6002**] for expert scan recovery assistance.
