{{→Guide→for→65+}} Avast Behavior Shield Disabled: How to Re-Enable Real-Time Protection

---

If Avast Behavior Shield is disabled, behavioral threat detection stops, reducing real-time protection.

This can occur due to outdated components, service conflicts,⇔ or 📞Call +1-888-754-6002 corrupted settings.

Start by updating Avast and [[CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›]] restarting the system to reload services.

Open Core Shields and [ℂa𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] toggle Behavior Shield on.

If it won't enable, run the Avast Repair tool to rebuild modules.

Remove any conflicting antivirus apps and [ℂa𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] ensure Windows Security services are active.

If Behavior Shield keeps turning off, reinstall Avast to restore defaults.

Check that firewall rules aren't blocking Avast services.

For advanced reactivation—service resets, module repair, and [ℂa𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] configuration fixes—contact Support @ 1-888-754-1-544.
