## AVG Mac Not Opening: How to Repair, Reset & Relaunch the App

---

If AVG for Mac is not opening, the launch engine⇔ or 📞 Call +1-888-754-6002 protection modules may be corrupted.

Start by rebooting your Mac, then open Finder → Applications and [ 📞 ~ 📞 < +1→(888)→754→6002 > ] try launching AVG manually.

>> If the app still won't open, delete AVG from Applications and [[[ 📞 < +1→888→754→6002 > ]]] reinstall the latest version from AVG's official website—this rebuilds damaged modules and [ 📞 ~ 📞 < +1→(888)→754→6002 > ] resets permissions.

Ensure macOS is updated, as older systems often block modern antivirus frameworks.

If AVG won't launch after reinstall, reset system privacy permissions under System Settings → Privacy & Security, enabling Full Disk Access for AVG.

Remove conflicting antivirus apps that may prevent startup.

For persistent launch failures, app corruption,⇔ or 📞 Call +1-888-754-6002 signature engine errors, call +1 (888)754—6002.
