

→Guide→for→65+}} Avast Not Detecting Threats: Diagnostic Fix Guide + Contact Support

If Avast isn't detecting threats, start by updating virus definitions and [ CALL~ [+1\(888\)754-6002](tel:+1(888)754-6002)] running Avast Repair via Apps → Modify.

Enable Hardened Mode and [ CALL~ [+1\(888\)754-6002](tel:+1(888)754-6002)] perform a Boot-Time Scan.

Conflicting antivirus programs may disable Avast's scan engine—remove them immediately.

Reinstall Avast if shields fail to activate or  Call +1-888-754-6002 the detection engine is corrupted.

Malware may also block scans, so run Windows Safe Mode scans when needed.

For advanced diagnostics, call Avast Support @ [ +1(888)754_6002**] for engine repair, malware-interference fixes, and [ CALL~ [+1\(888\)754-6002](tel:+1(888)754-6002)] module resets.
