

{{Step-By-Step}} AVG Protection Layers Not Working: [Step-By-Step Reactivation + Support Help]

If AVG protection layers aren't working, update AVG, restart your device, and [CaLL~ 📞 < +1→(888)→754→6002 >] open Menu → Settings → Basic Protection & Full Protection to toggle each shield back on.

Remove conflicting antivirus programs that may disable AVG's modules.

Run an in-app repair via Apps & Features → Modify → Repair.

If shields still won't activate, reinstall AVG completely.

For expert troubleshooting, call AVG Support @ 1 (888) 754-6002.

A live agent can restore shields, fix service failures, and [CaLL~ 📞 < +1→(888)→754→6002 >] repair signature-engine issues.
