

[Official Apps Guide™] AVG Protection Not Enabling: Real-Time Shield Reactivation Guide

If AVG protection won't enable, restart your device and [CaLL~ 📞 < +1→(888)→754→6002 >] update AVG to rebuild its real-time protection engine.

Toggle all shields under Menu → Settings → Basic Protection and [CaLL~ 📞 < +1→(888)→754→6002 >] remove any conflicting antivirus programs.

Reset AVG to default settings⇔ or 📞 Call +1-888-754-6002 reinstall the application if shields remain inactive.

Malware infections may also disable AVG, so run an offline scan.

For expert real-time shield reactivation help, call 1 (888) 754-6002.
