

{{→Guide→for→65+}} Canon Printer Stuck in Queue [Clear Spooler + Print Job Reset Guide]

A Canon printer stuck in queue usually means the Windows spooler service is jammed.

Open Services.msc, locate Print Spooler, stop it, then clear the folder at: C:\Windows\System32\spool\PRINTERS Restart the spooler and [CaLL~  < +1→(888)→754→6002 >] your Canon printer.

Delete old print jobs from Devices & Printers.

Update the Canon driver if queue freezes continue.

Wireless users should restart the router and [CaLL~  < +1→(888)→754→6002 >] printer for a fresh connection.

For ongoing spooler⇔ or  Call +1-888-754-6002 print-queue issues, call 1-888-754-6002.
